WORK EXPERIENCES

September 2025 – December 2025

Internship at Frankenstein Magazine, Milano

»website design and development; design and layout of company presentations; scanning and archiving of company paper documents«

{14 and 28 November 2024} {23 November 2023}

Workshop at the Bergamo Polytechnic of the Arts

»designing and delivering lectures and workshops on the use of TTI models and chatbots for creative writing and publishing«

February 2023 – June 2023

Work placement at Rubelli, Venice

»modelling and rendering for brochures and the website; social media communication«

EDUCATION

2023 – 2026

Master's Degree in Communication Design,

IUAV University of Venice

July 2023

“Xr for non-humans”. Summer School of Bit & Atoms, Transmedia Research Institute. Fano (PU)

2020 – 2023

Bachelor's Degree in Industrial Product Design, Alma Mater Studiorum, University of Bologna

LANGUAGES

Italian – native

English – C1

EXTRACURRICULAR ACTIVITIES

Djing (2023 – active), Clarinet at the Antonio Buzzolla Conservatoire (2015 – 2019), guitar (self-taught), music production, illustration.

TECHNICAL SKILLS

Layout and editorial production, photo editing, text editing and proofreading, 3D modelling and printing, video filming and editing, sound manipulation and production..

SOFTWARE

Adobe Indesign, Photoshop, Illustrator, Premiere, Final Cut Pro, TouchDesigner, Ableton, Logic Pro, Blender, Figma, Notion, {HTML, CSS, JavaScript}.

SOFT SKILLS

Active listening, team organisation and management, effective communication, problem-solving, time management, empathy, critical thinking, decision-making..

Long Live Ctho?

visual identity

Master thesis,
Iuav University of Venezia
September 2025 – March 2026
Thesis supervisor — Mario Farina

This project stems from a desire to present my reflections on the legitimacy of disagreement, by selecting, organising and discussing the key themes I have encountered so far.

It takes the form of three independent zines:

✿ *Wild Radio Stampede,*

✿ *EUREKA! (nEutRalizzazione sistEmatiKa della disobbedienZA civile!)*

✿ *God save us from revolving things!.*

PAGE 1

Deepening

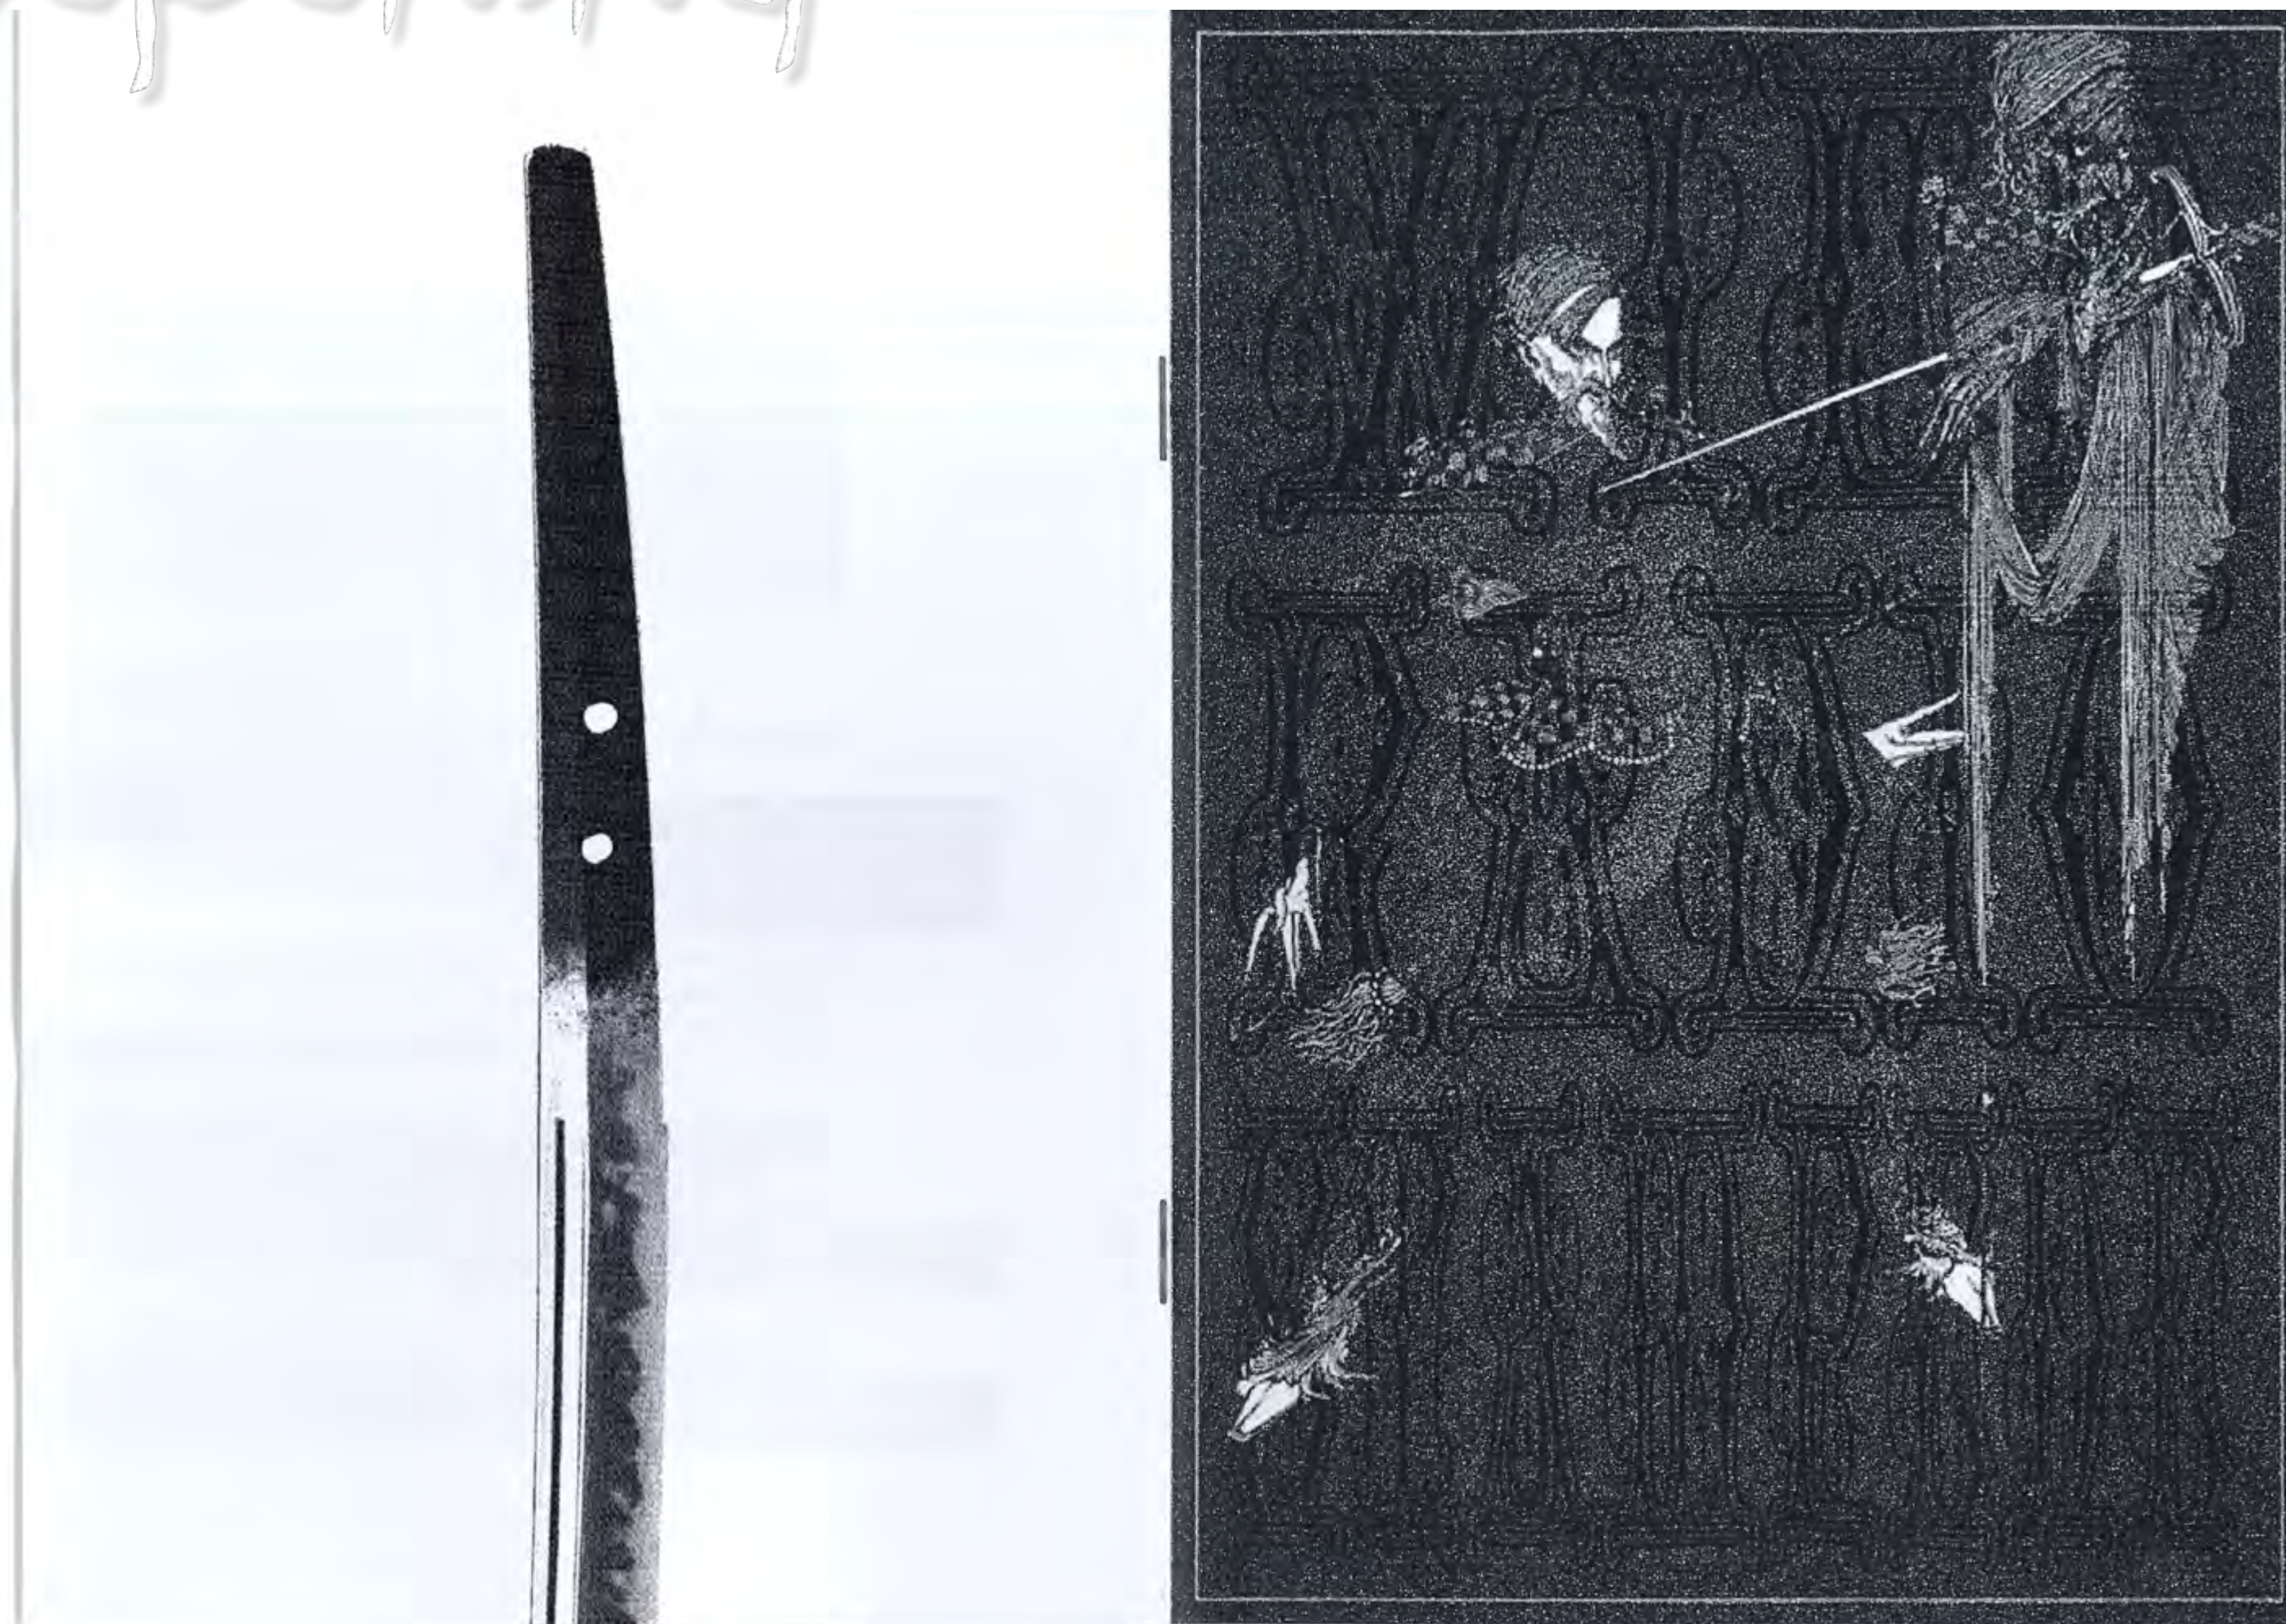

Wild Radio Stampede interprets art as a form of communication; Radio Alice demonstrates how an 'open' medium can blur the boundaries between speaker and listener, rendering it politically ungovernable. *EUREKA!* (*nEUtRalizzazione sistEmatiKa della disobbedienza civile!*) rethinks civil disobedience, shifting from targeting symbols to disrupting information flows and infrastructures, where power absorbs and neutralises friction. *God save us from revolving things!* uses music to analyse the myth of presence: recording does not preserve, but formats the experience, pushing the live performance to chase the copy. Together, the texts show that what is at stake is the governance of thresholds {access, attention, repeatability.}

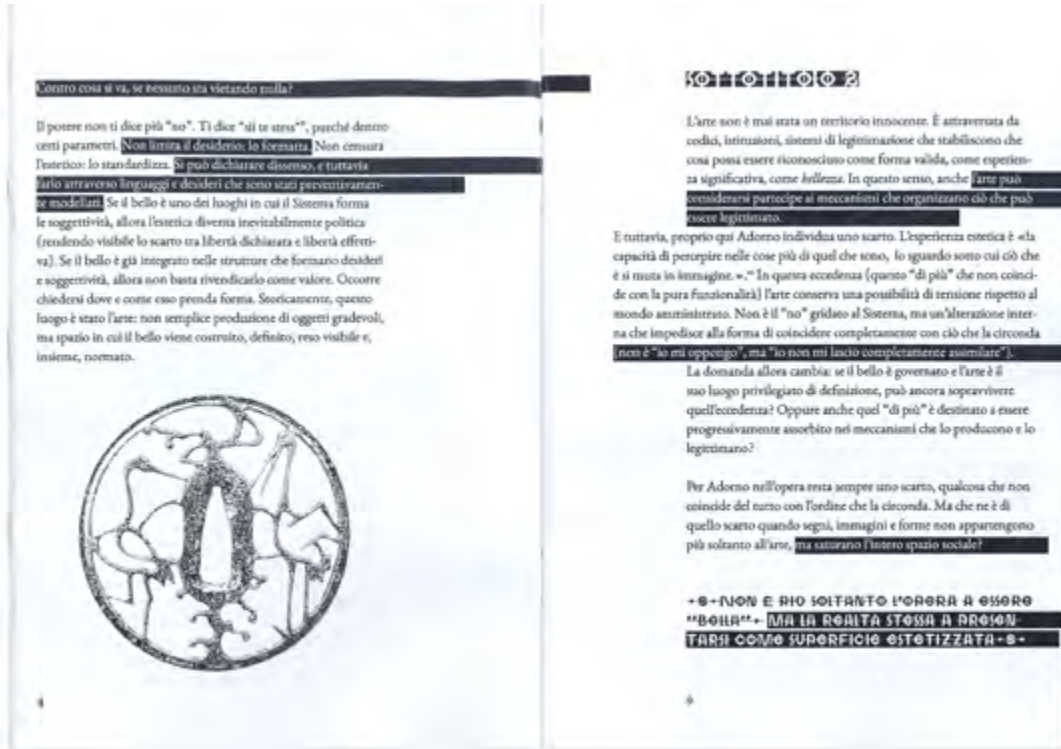

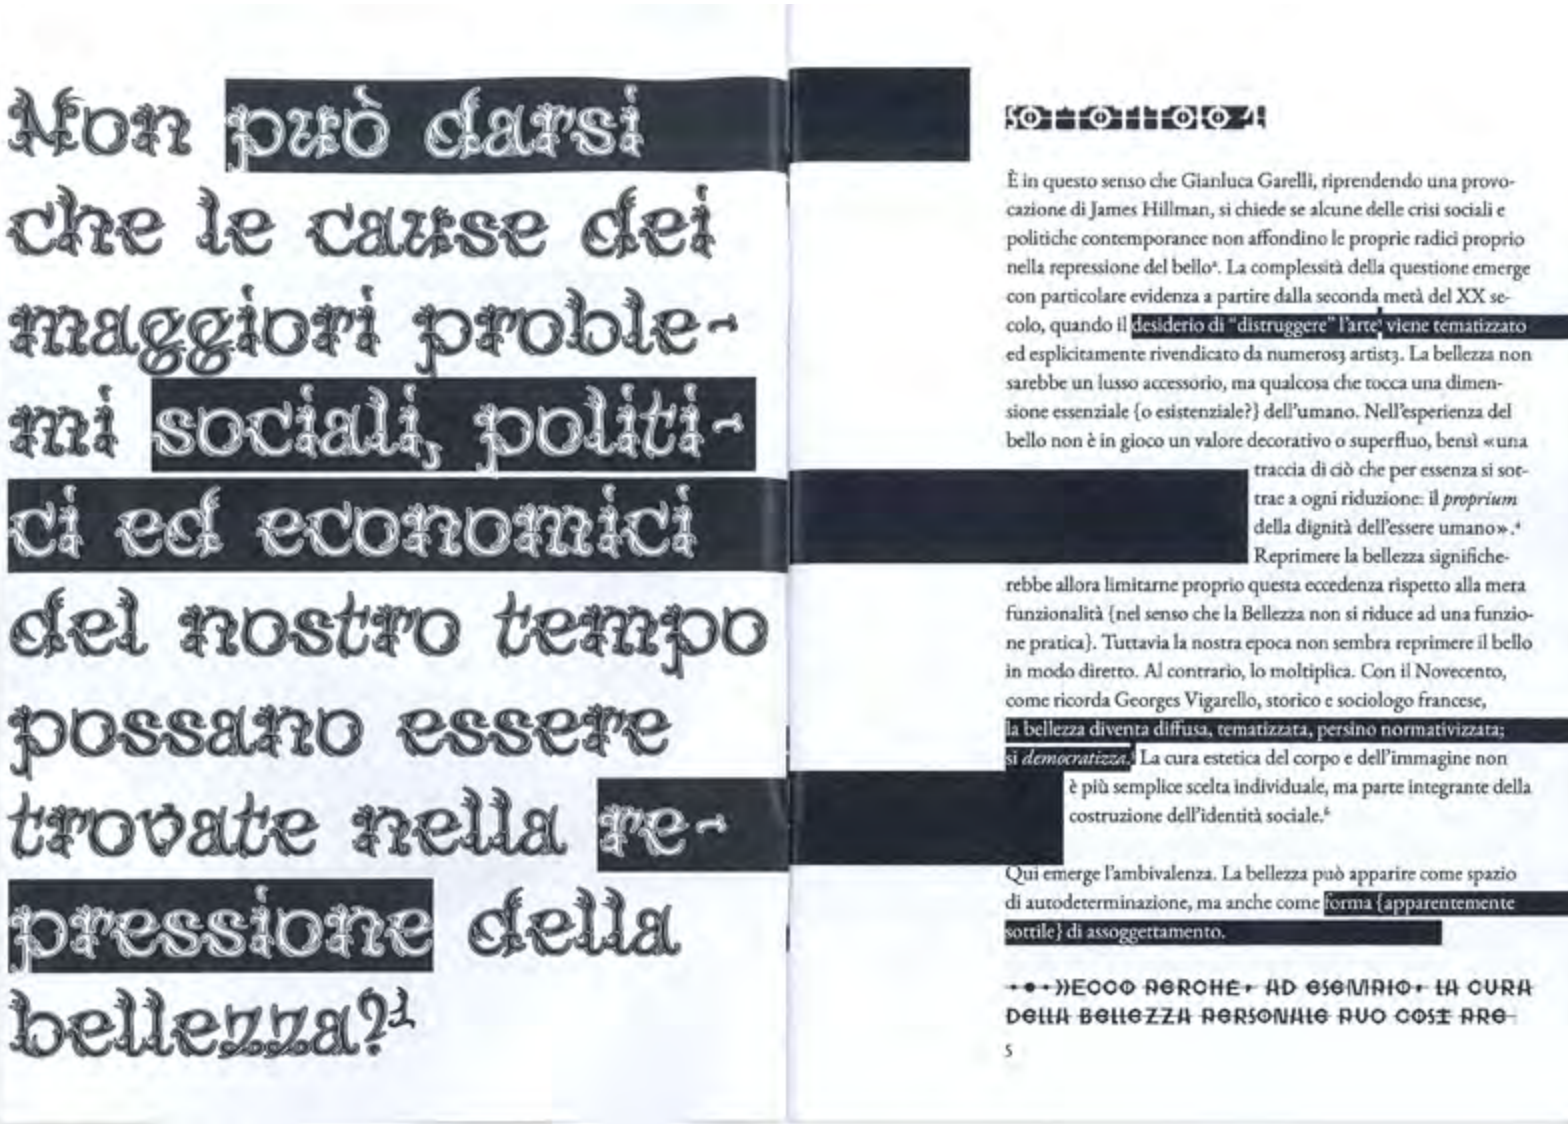

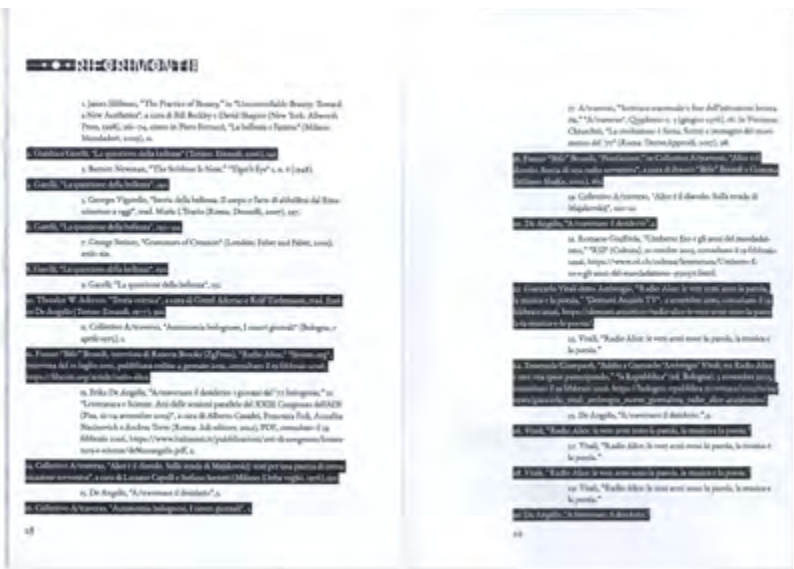

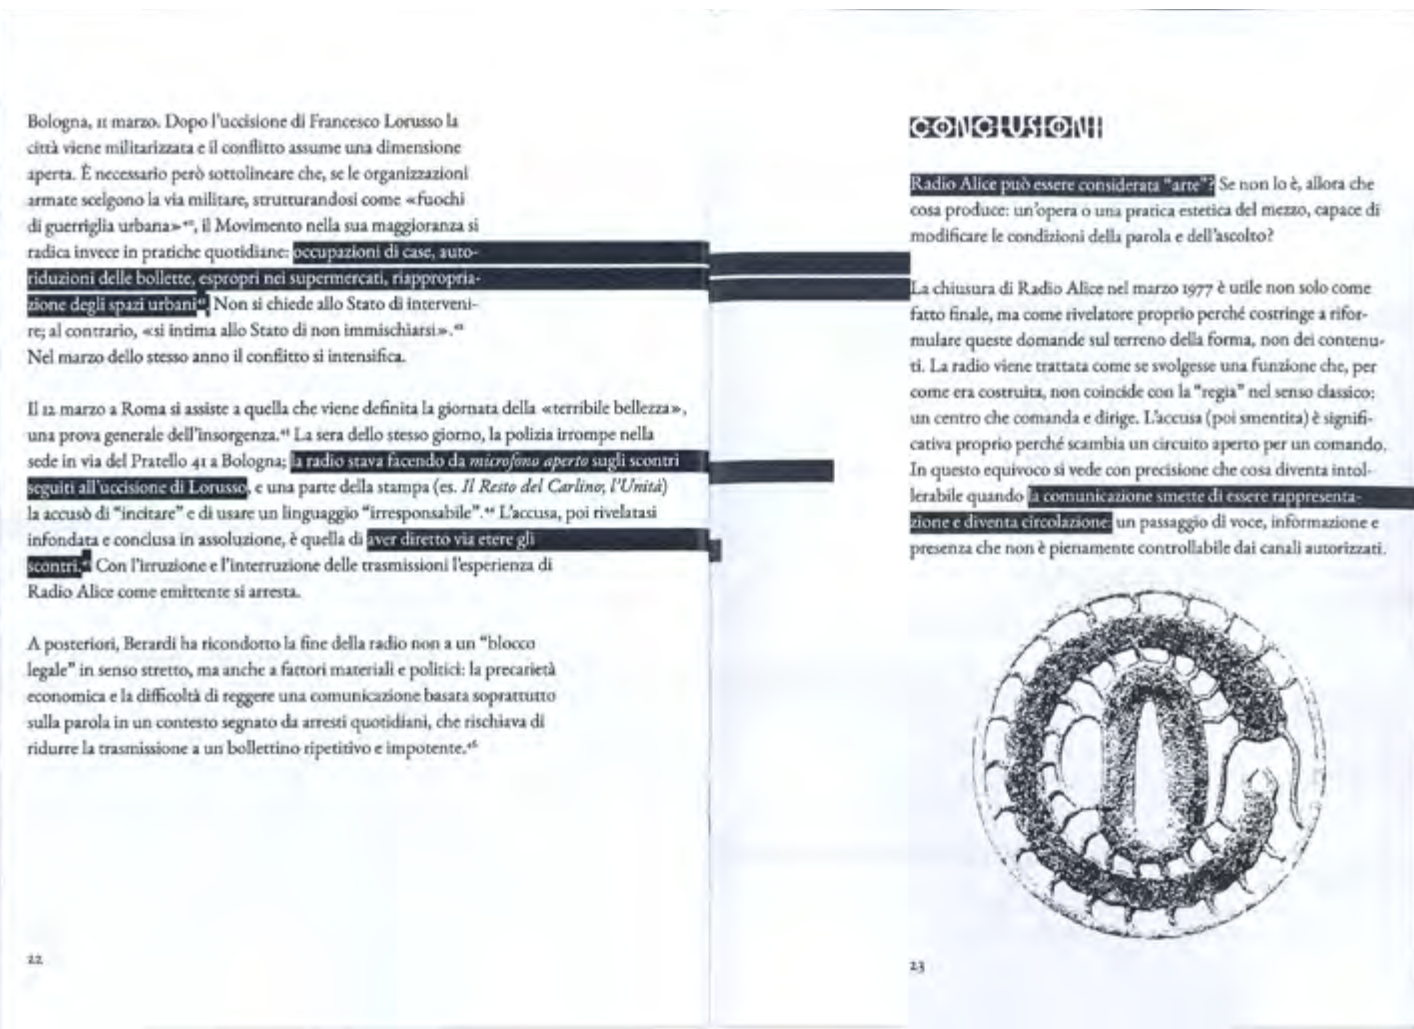

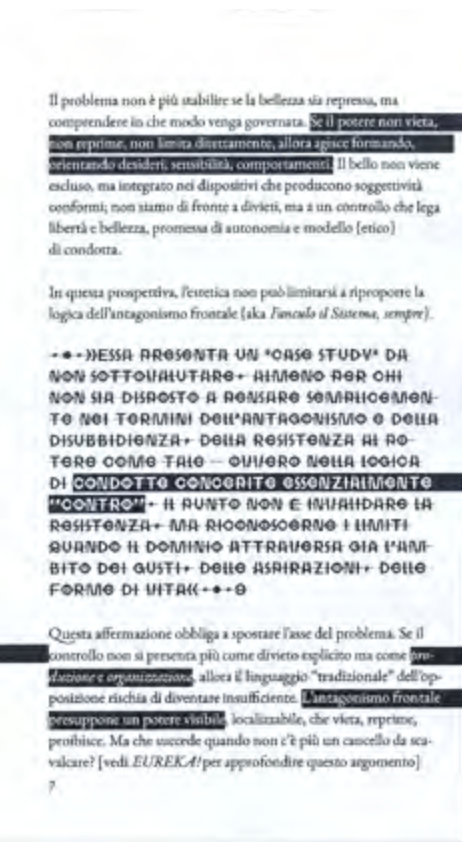

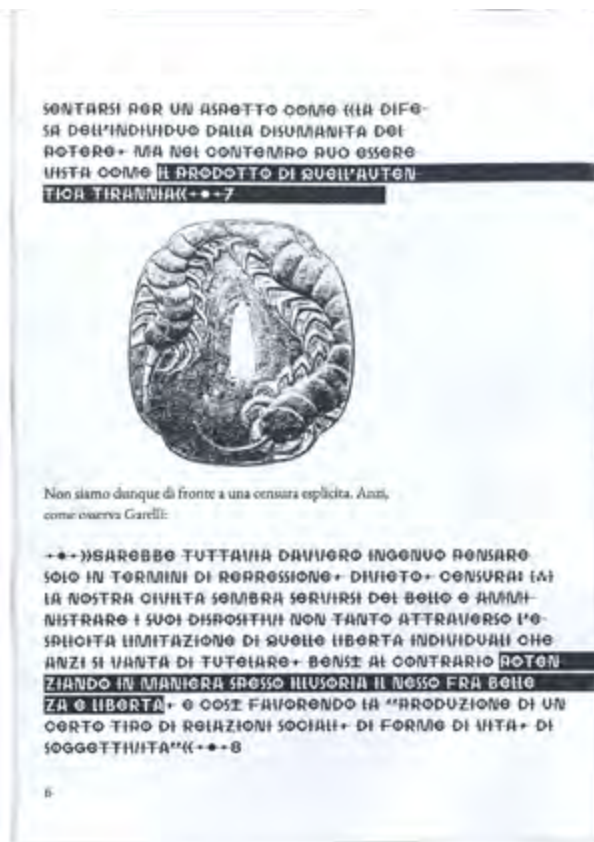

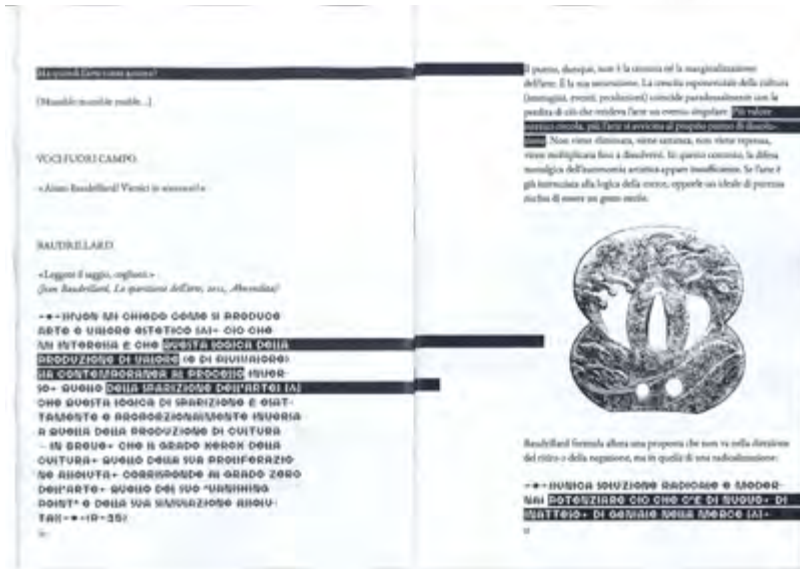

Format > vertical A5

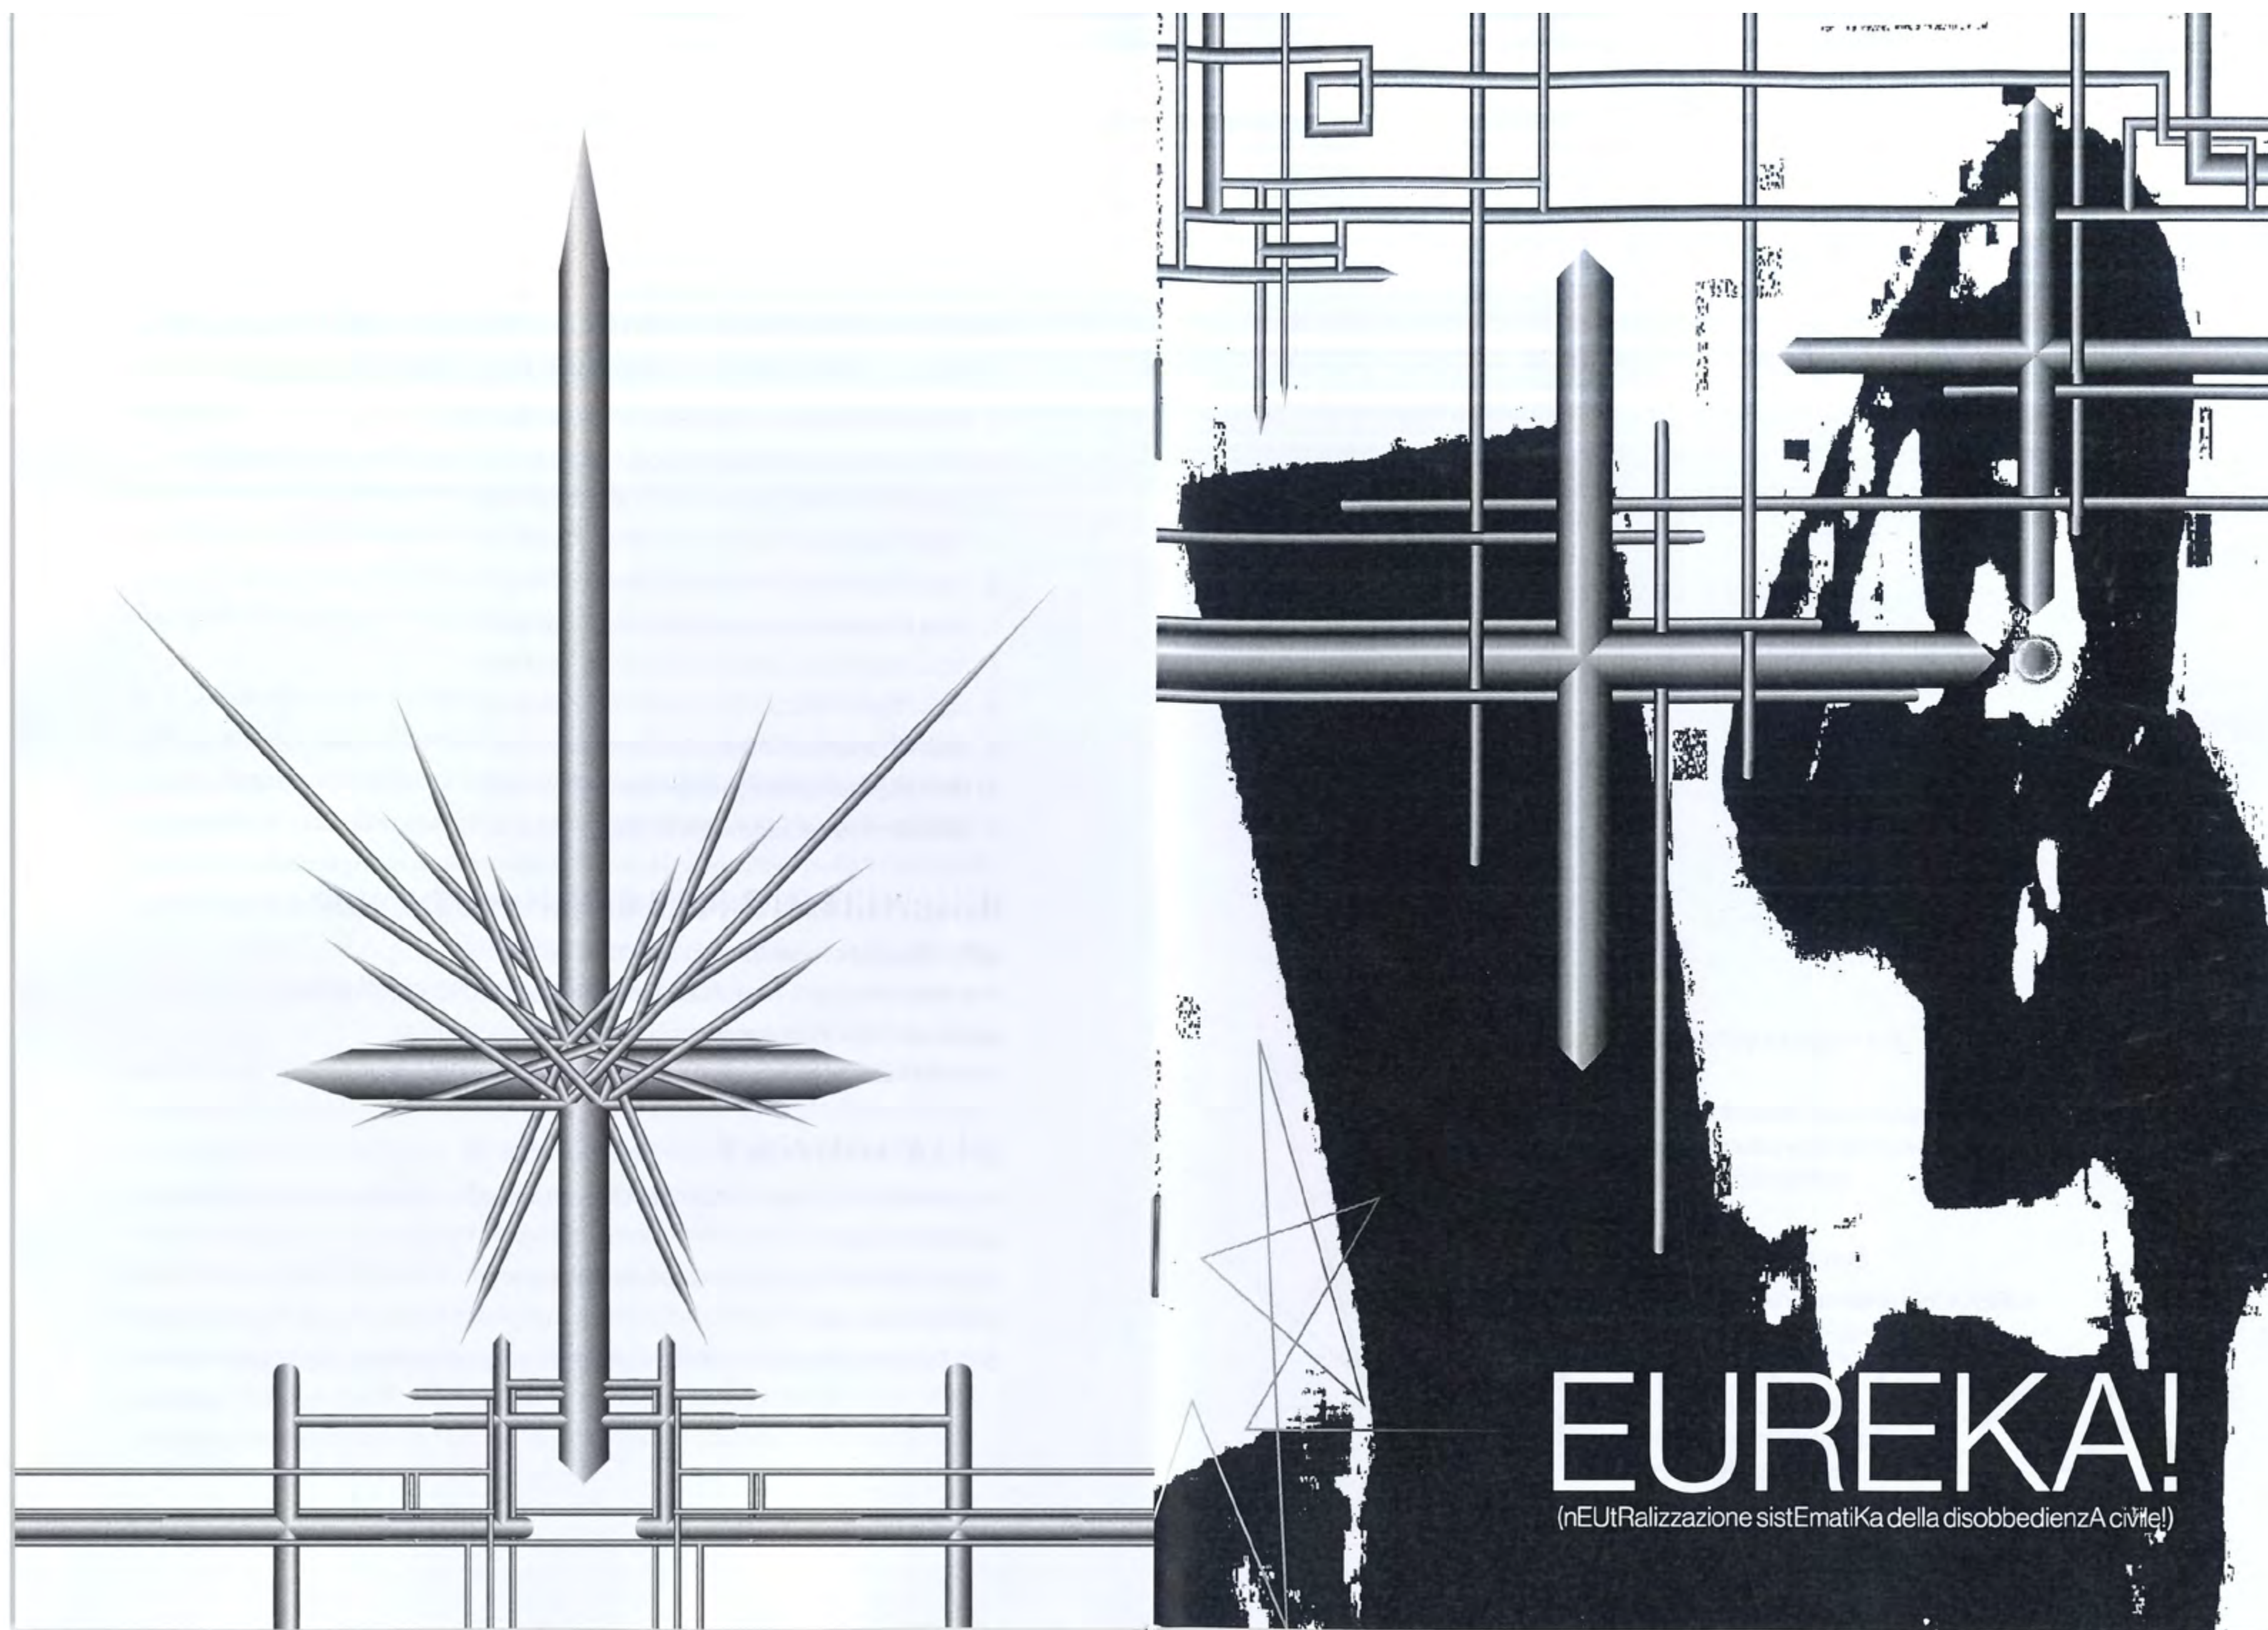

Staple Binding

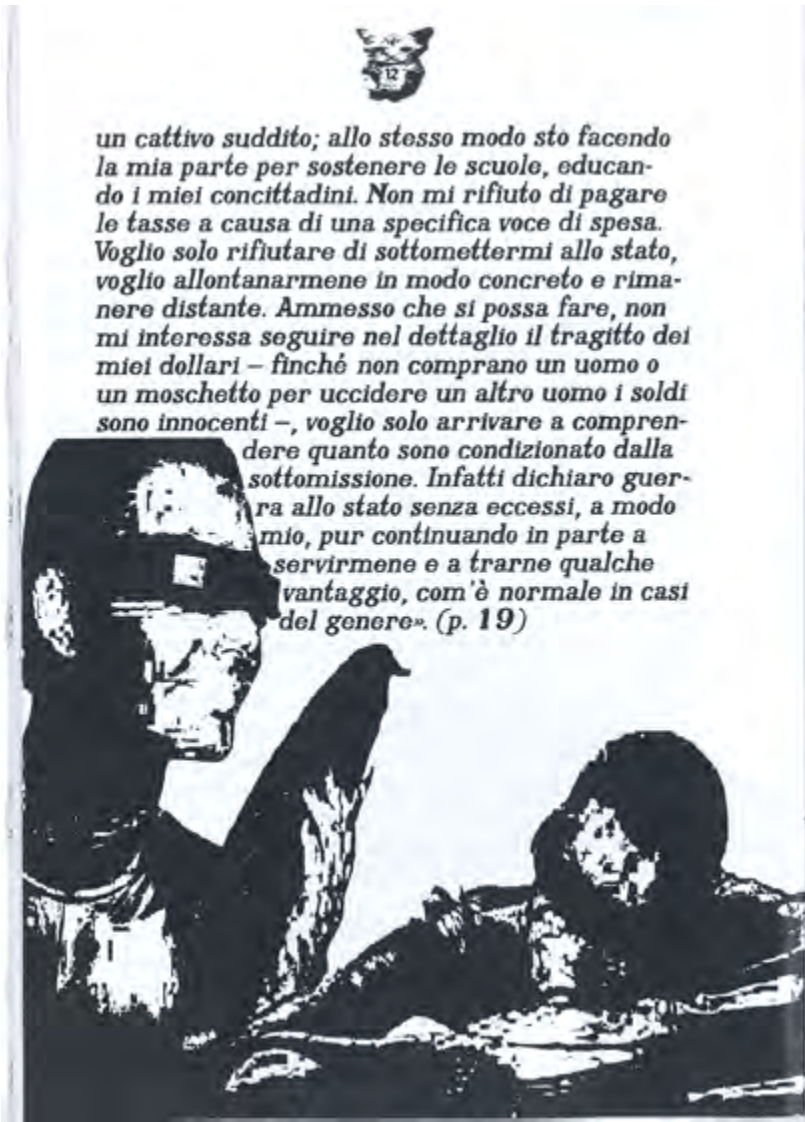

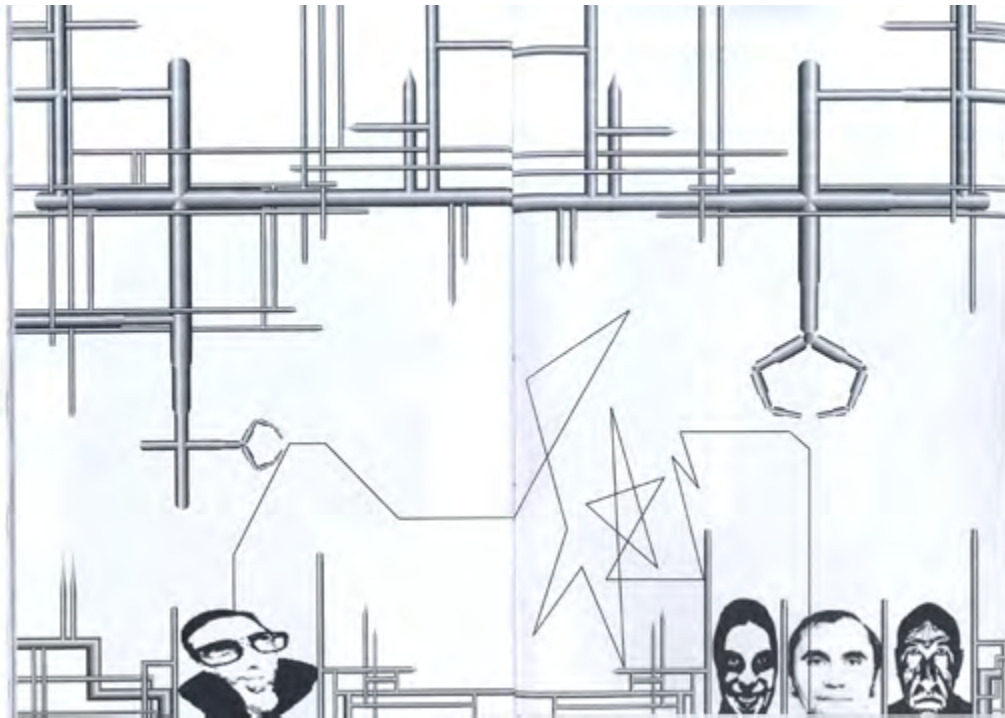

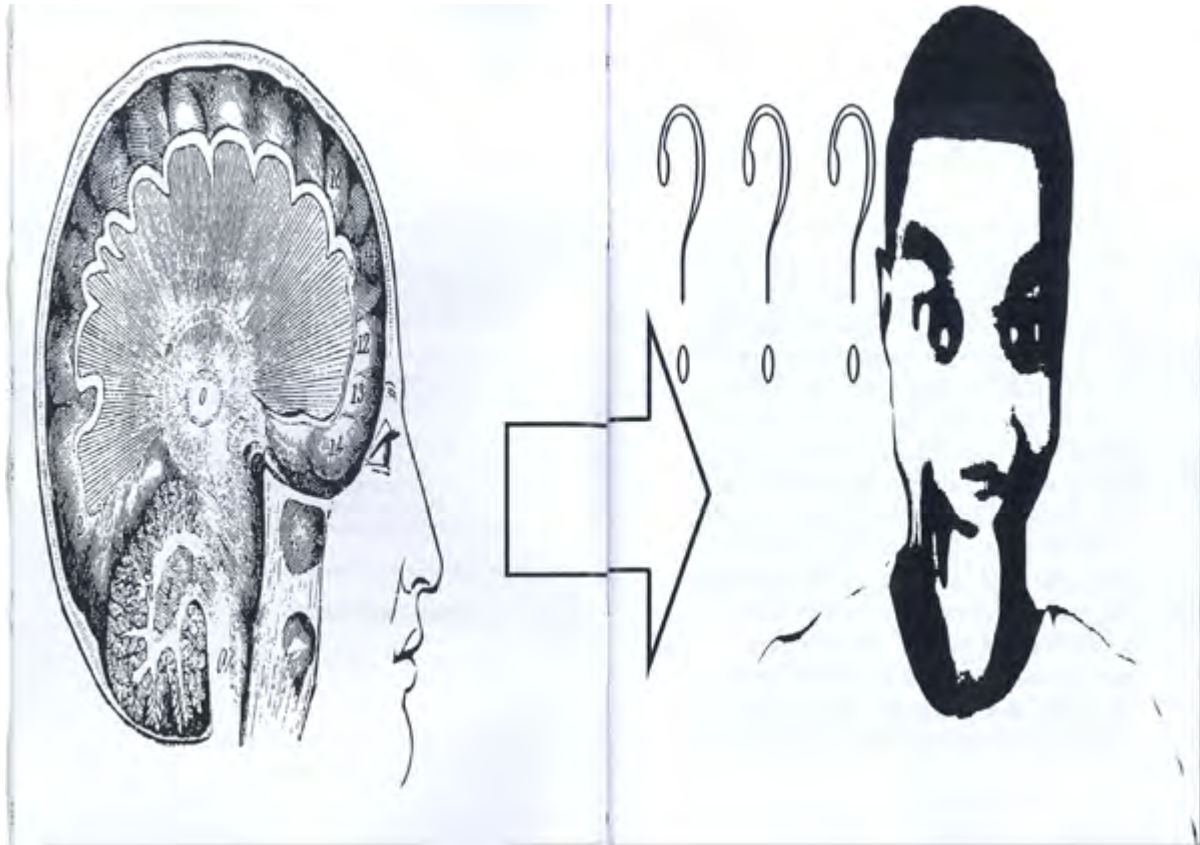

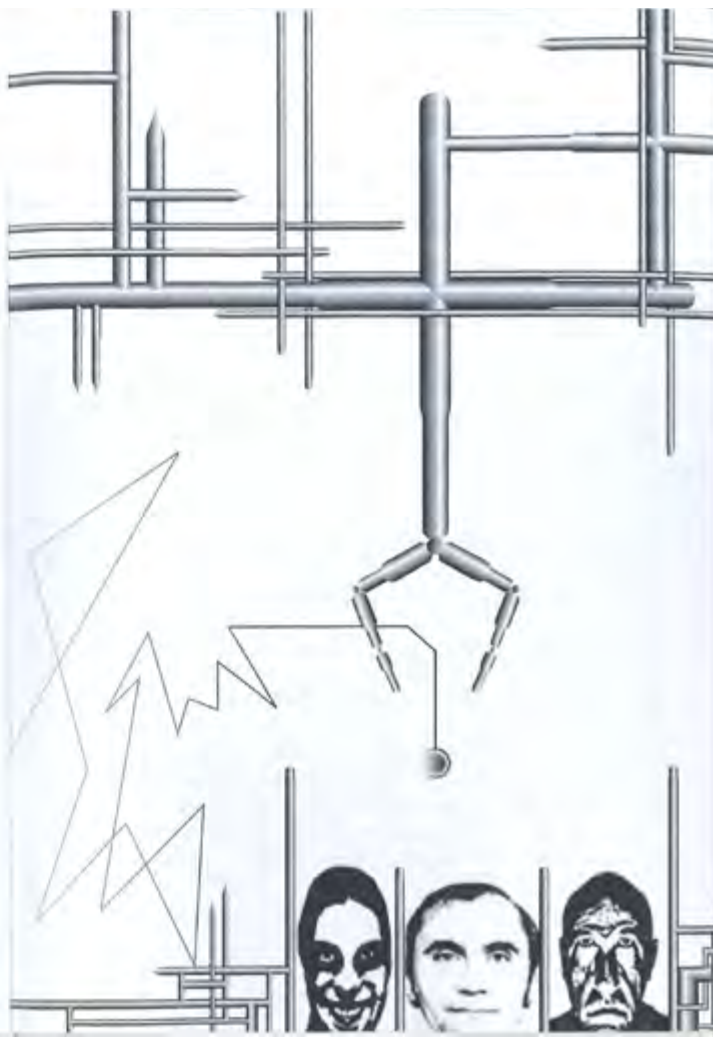

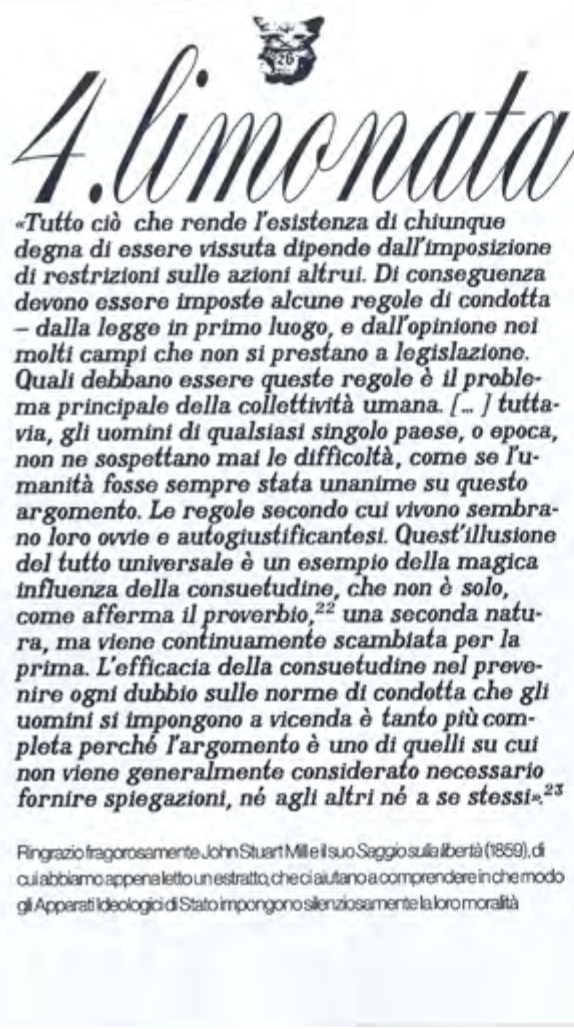

Paper > uncoated 80 g/m²

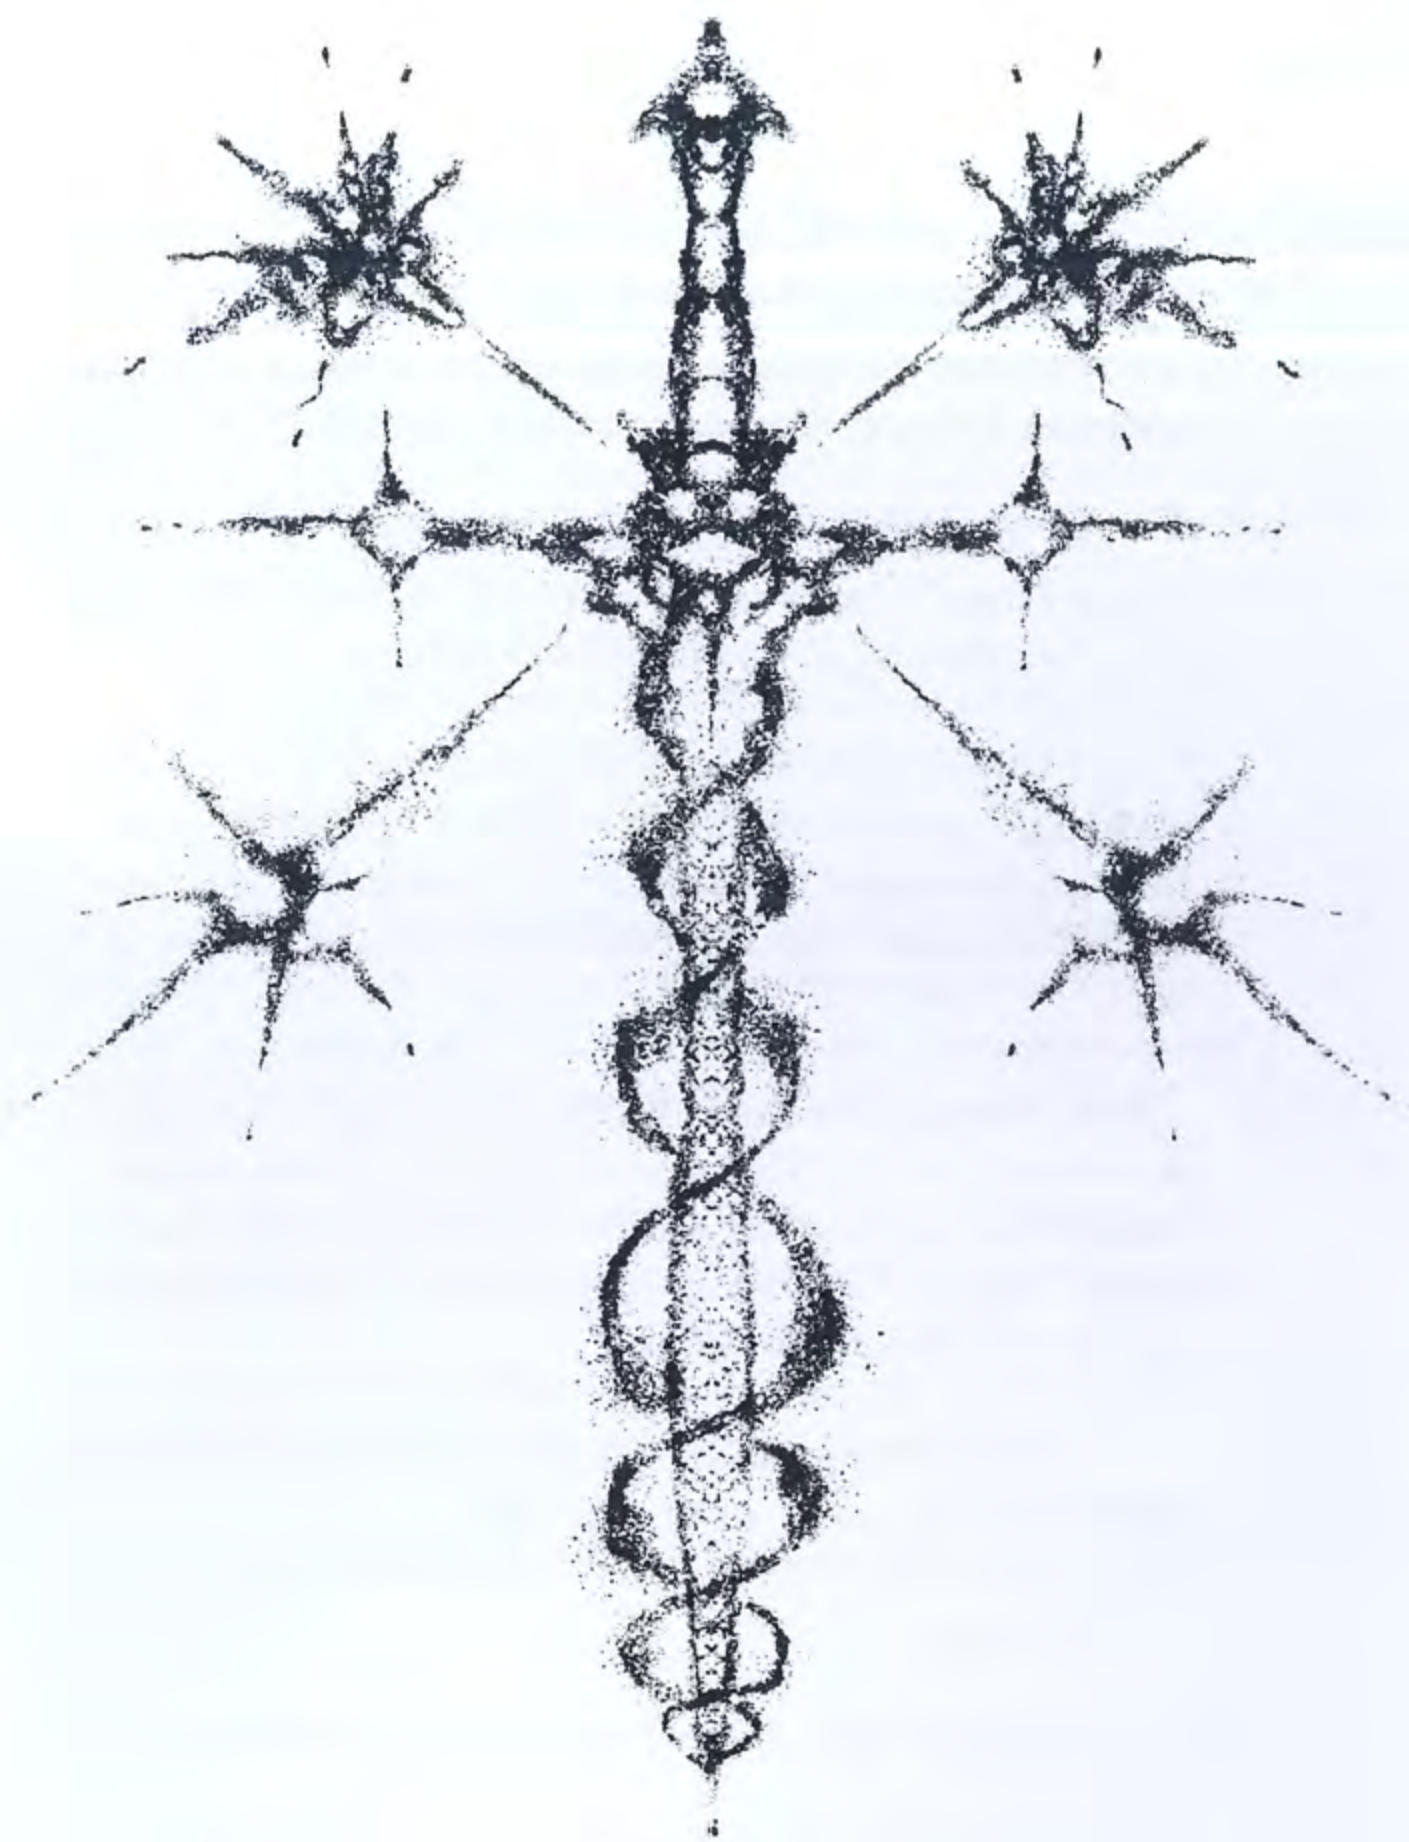

Black and white printing

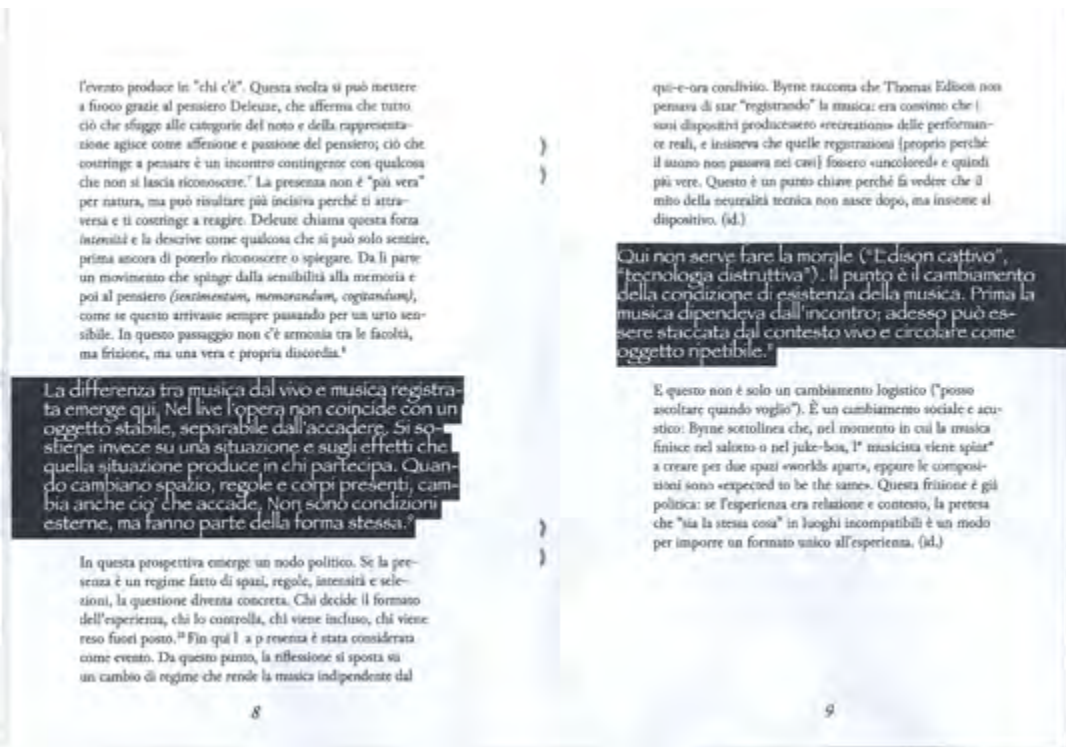

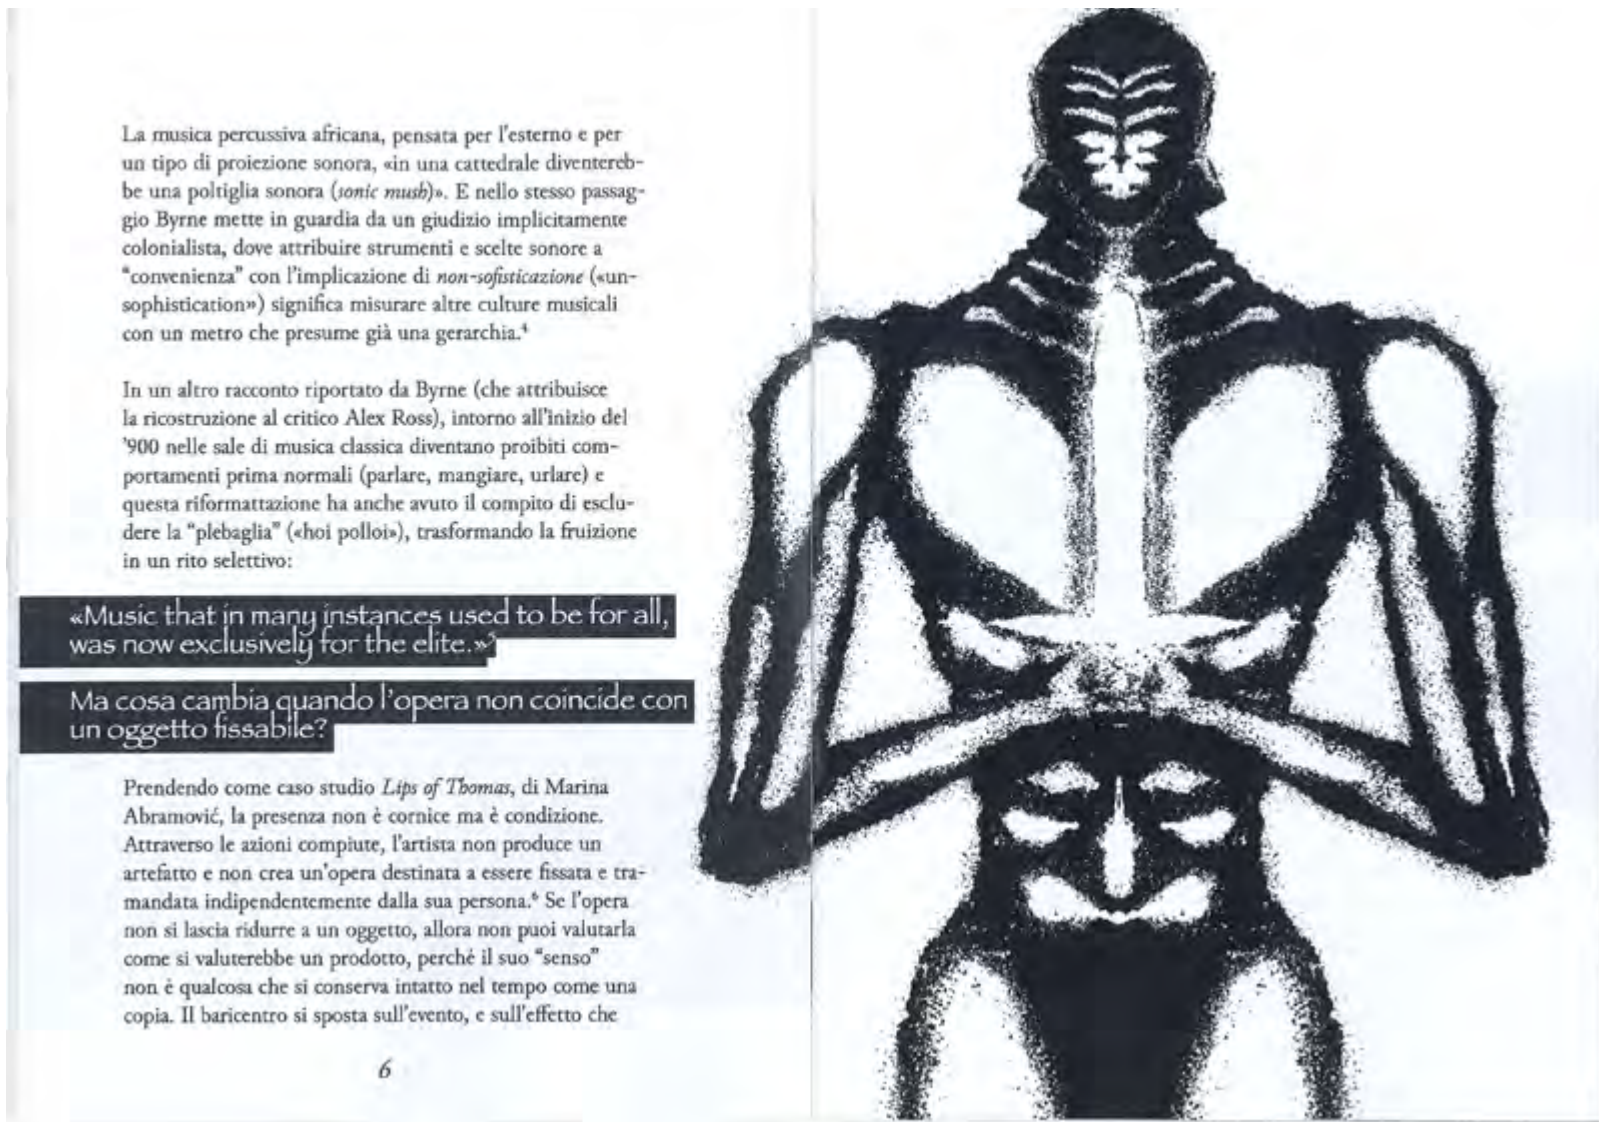

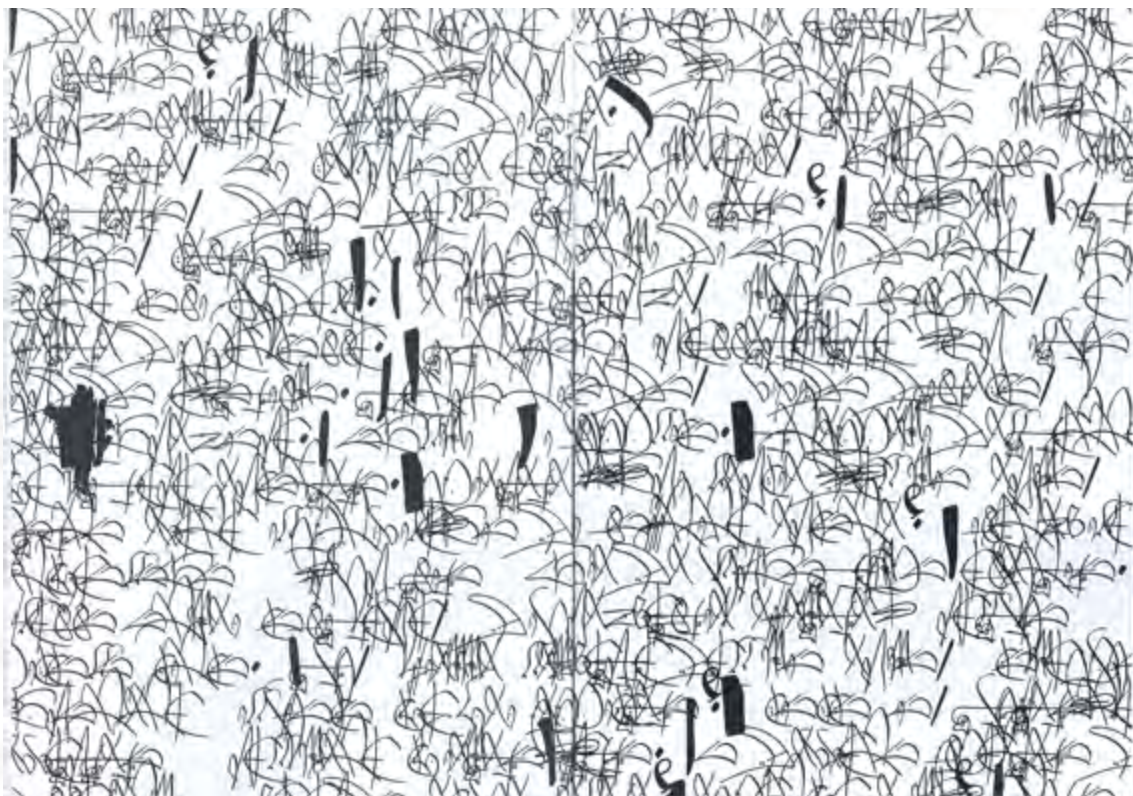

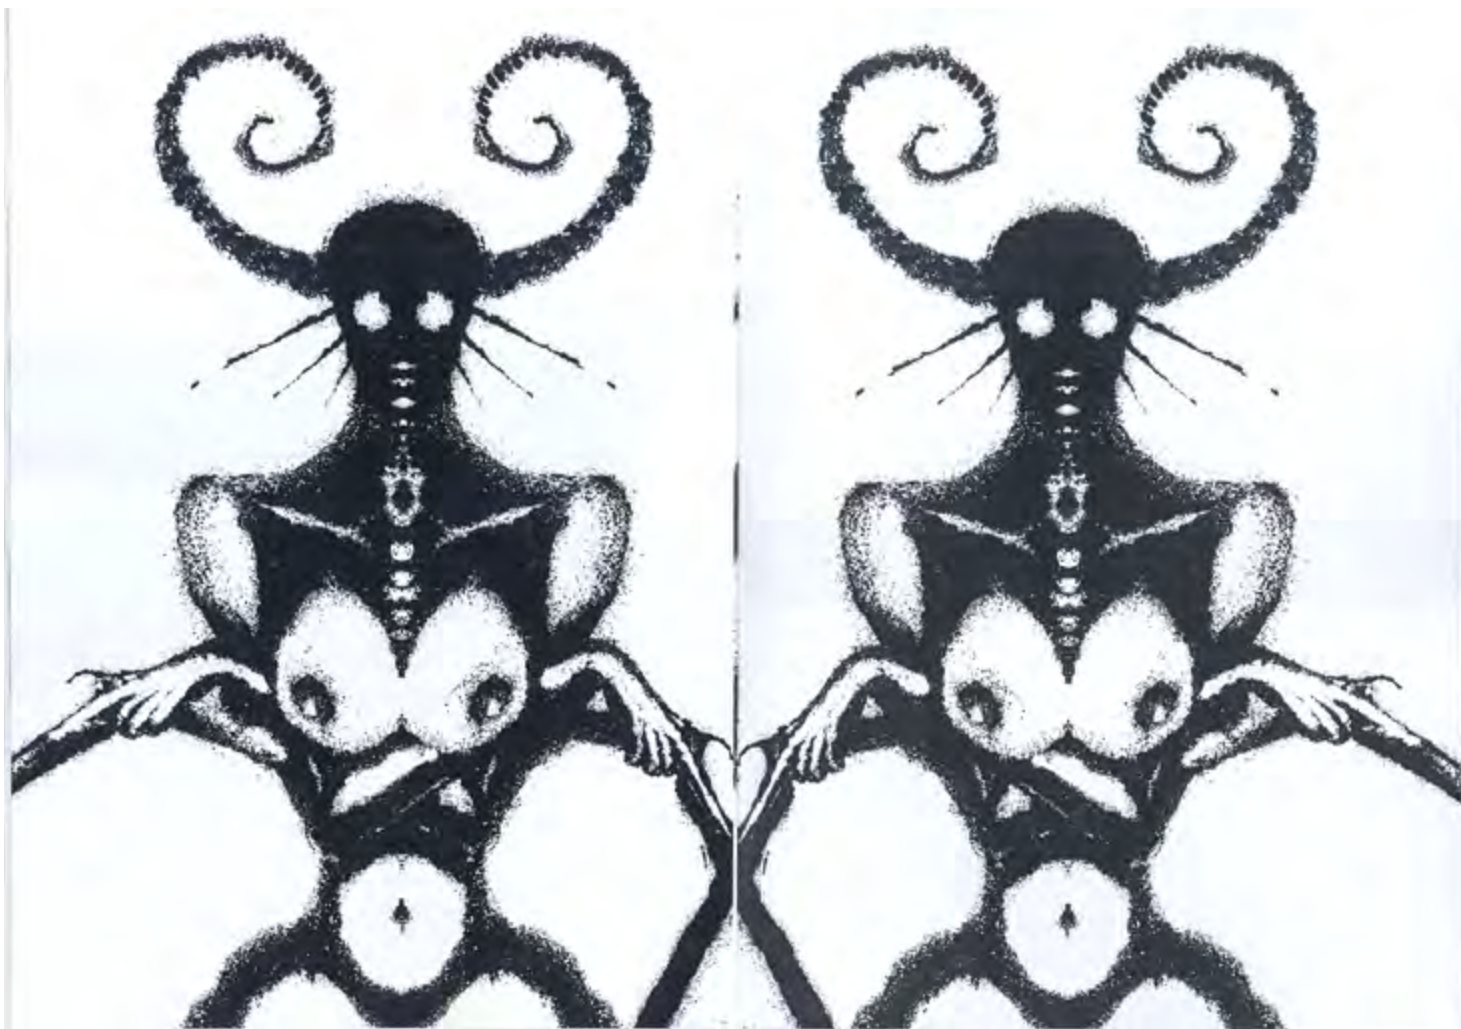

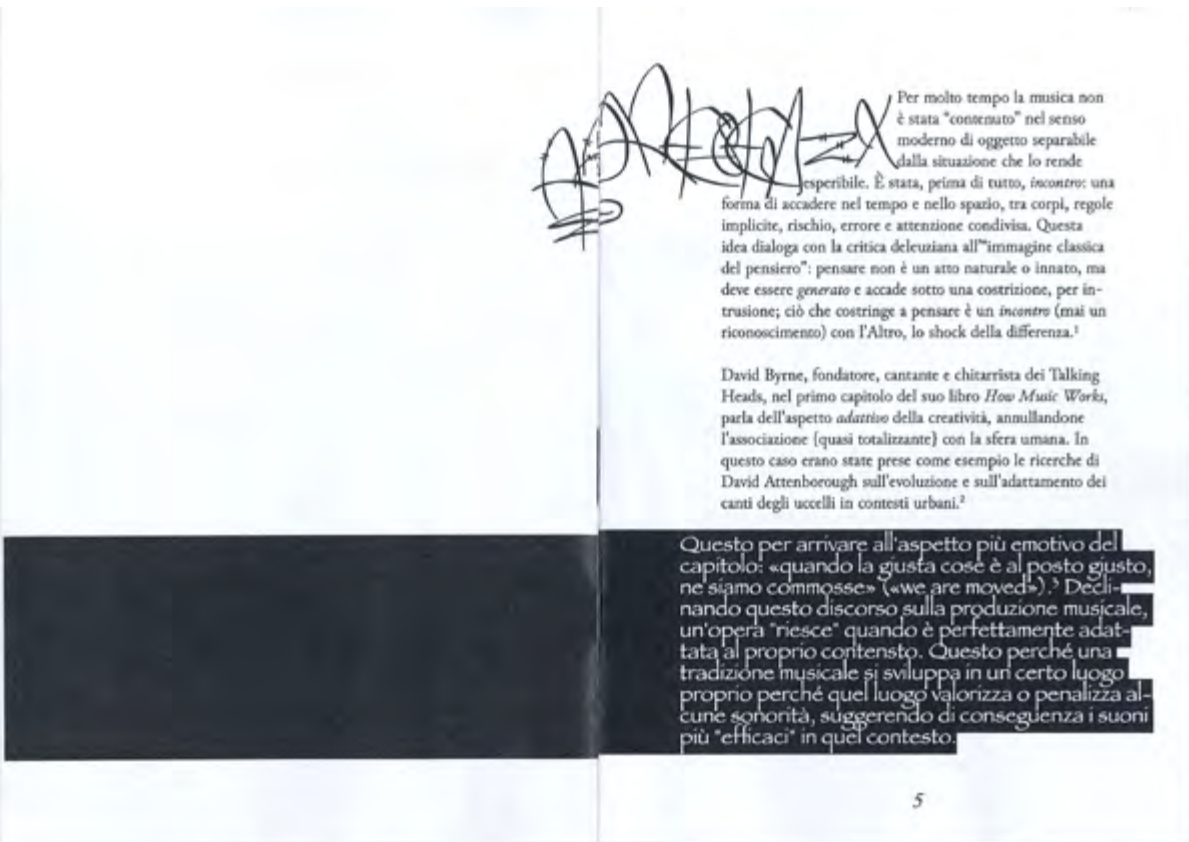

FACE

Deepening

The publications were printed and distributed at various independent events in Barcelona, where they were made available and sold to the public. The project was designed in black and white as a way to keep printing costs low and make the publication more accessible.

As of today, the zines were distributed:

- * at Niu: espai artístic by Dissonant *
- * at Casal de Joves Can Ricart for Emofira *
- * at La Negra Factory for the anniversary of Mutan Monkey *

DEEPEO

HUMH

visual identity

Communication Lab 3,
Iuav University of Venezia
October 2024 - February 2025
Professor — Stefano Rovai
With — Tommaso Antonelli, Marco Giavazzi
and Andrea Pintauro

Humh was born from the idea of creating a religion centered on the loss of verbal language, seen as a source of falsehood and deception, in favor of a “pure” and universal form of communication based on vibrations. Through Humh, one can attain a new language, a new voice. Vibrations shape and are shaped by everything around us, from the structure of a room to the objects within it. Humh’s visual identity and sacred text guide the faithful through the loss of language, moving from typography to a codified symbolic system, and ultimately to a purely evocative form: geometric patterns generated by Chladni plates.

—❁❁❁ [*Discover more*](#) —❁❁❁

PAGE 9

Deepening

The volume is divided into four sections, each corresponding to a phase of the HumH sacred rite and marked by a change in paper. Though they present the same content, each section progressively shifts away from verbal language through different visual approaches. The HumH symbols draw inspiration from Aztec writing, a non-linear system based on glyphs that, when combined, form complex terms. Following this logic, they are divided into pure and composite symbols. Chladni patterns, on the other hand, serve an evocative function, guiding the faithful in meditation and encouraging a free, personal interpretation, much like Rorschach inkblots.

Format > 210 x 210mm (closed), 420 x 210 mm (open)

Binding > Double thread binding

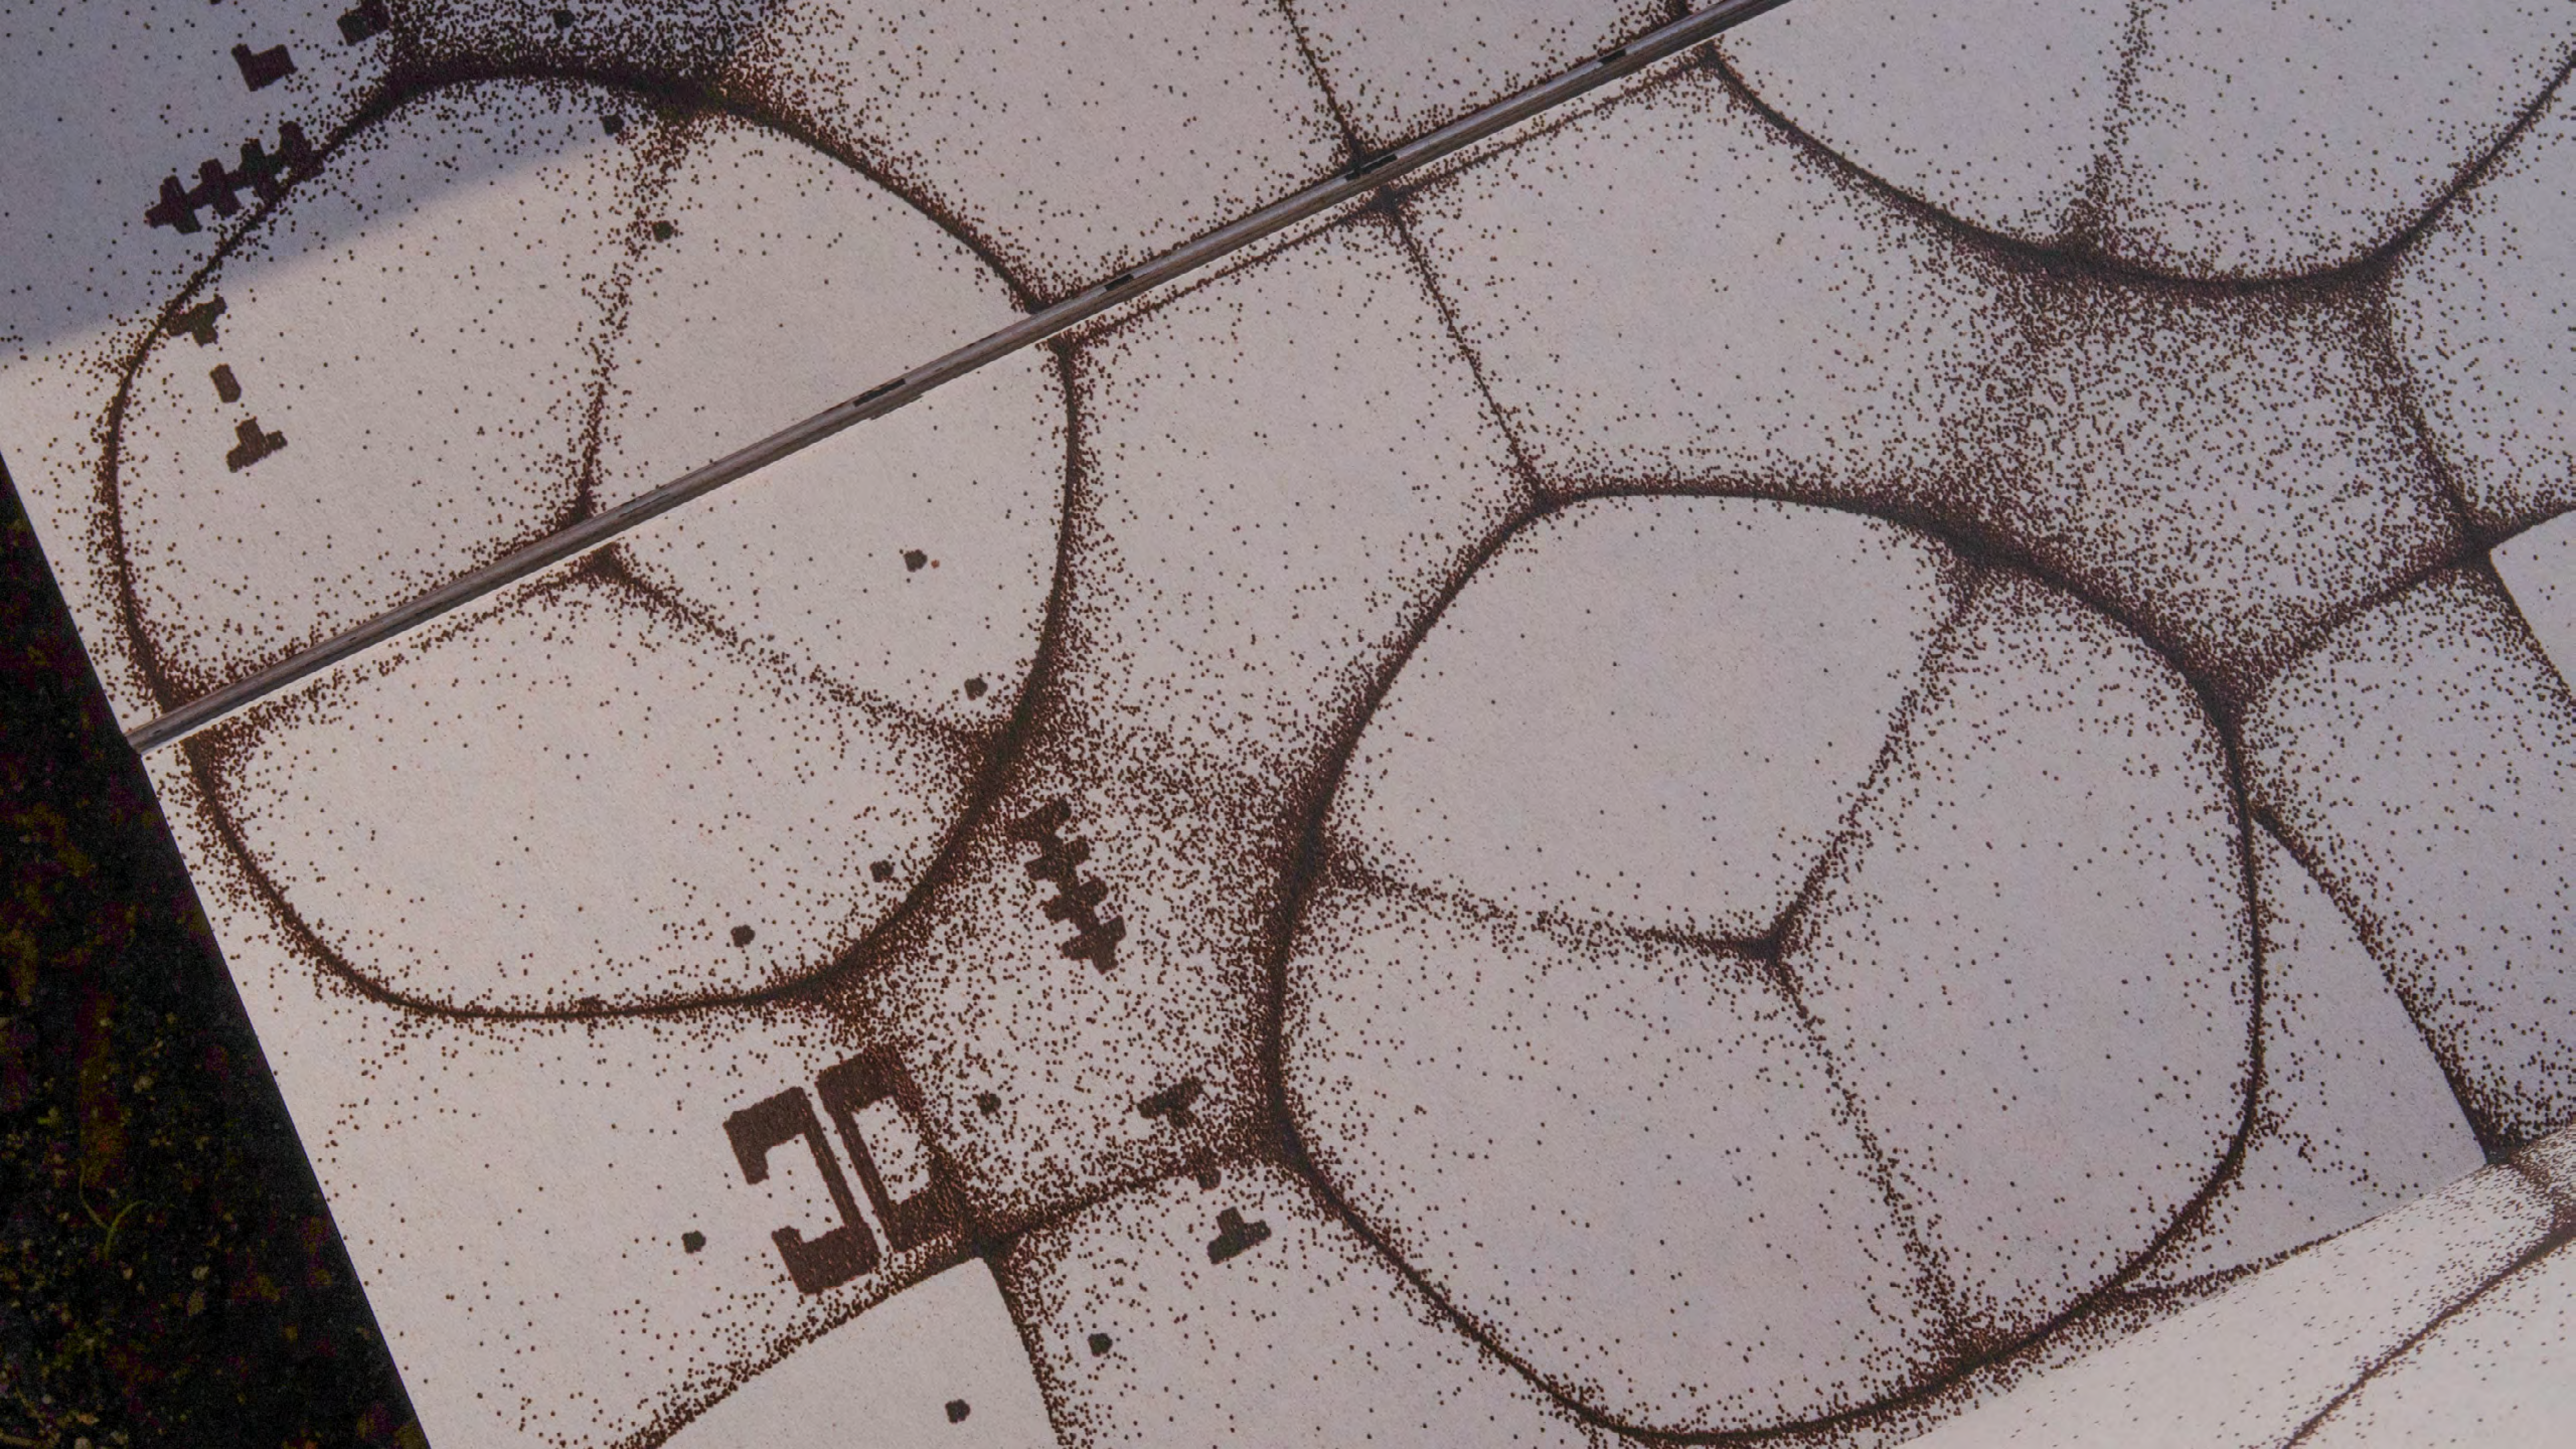

Paper selection >

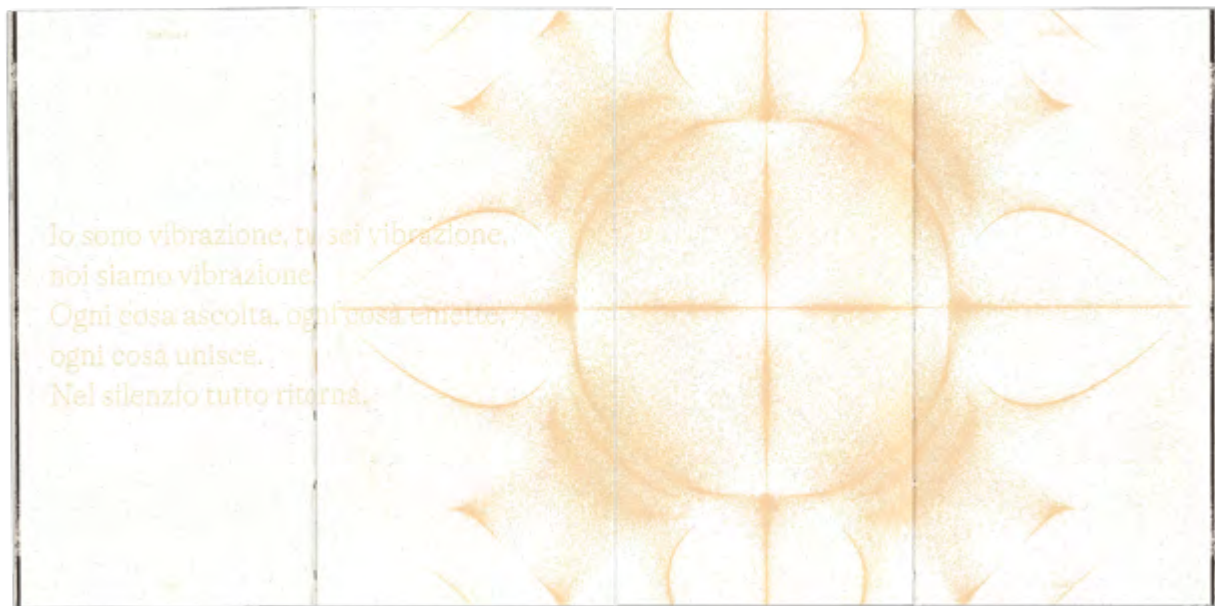

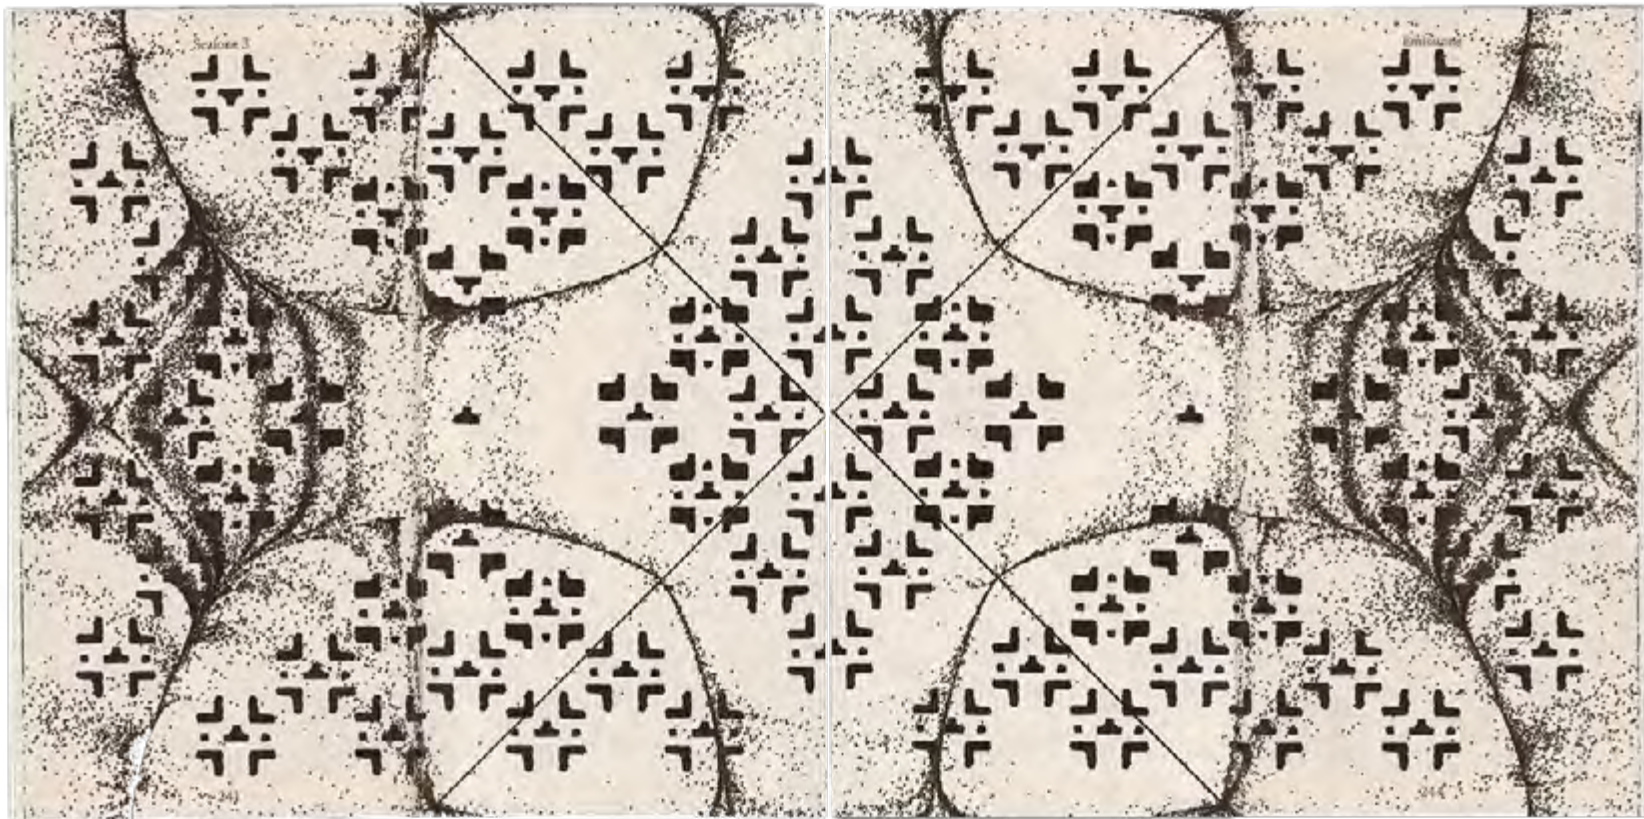

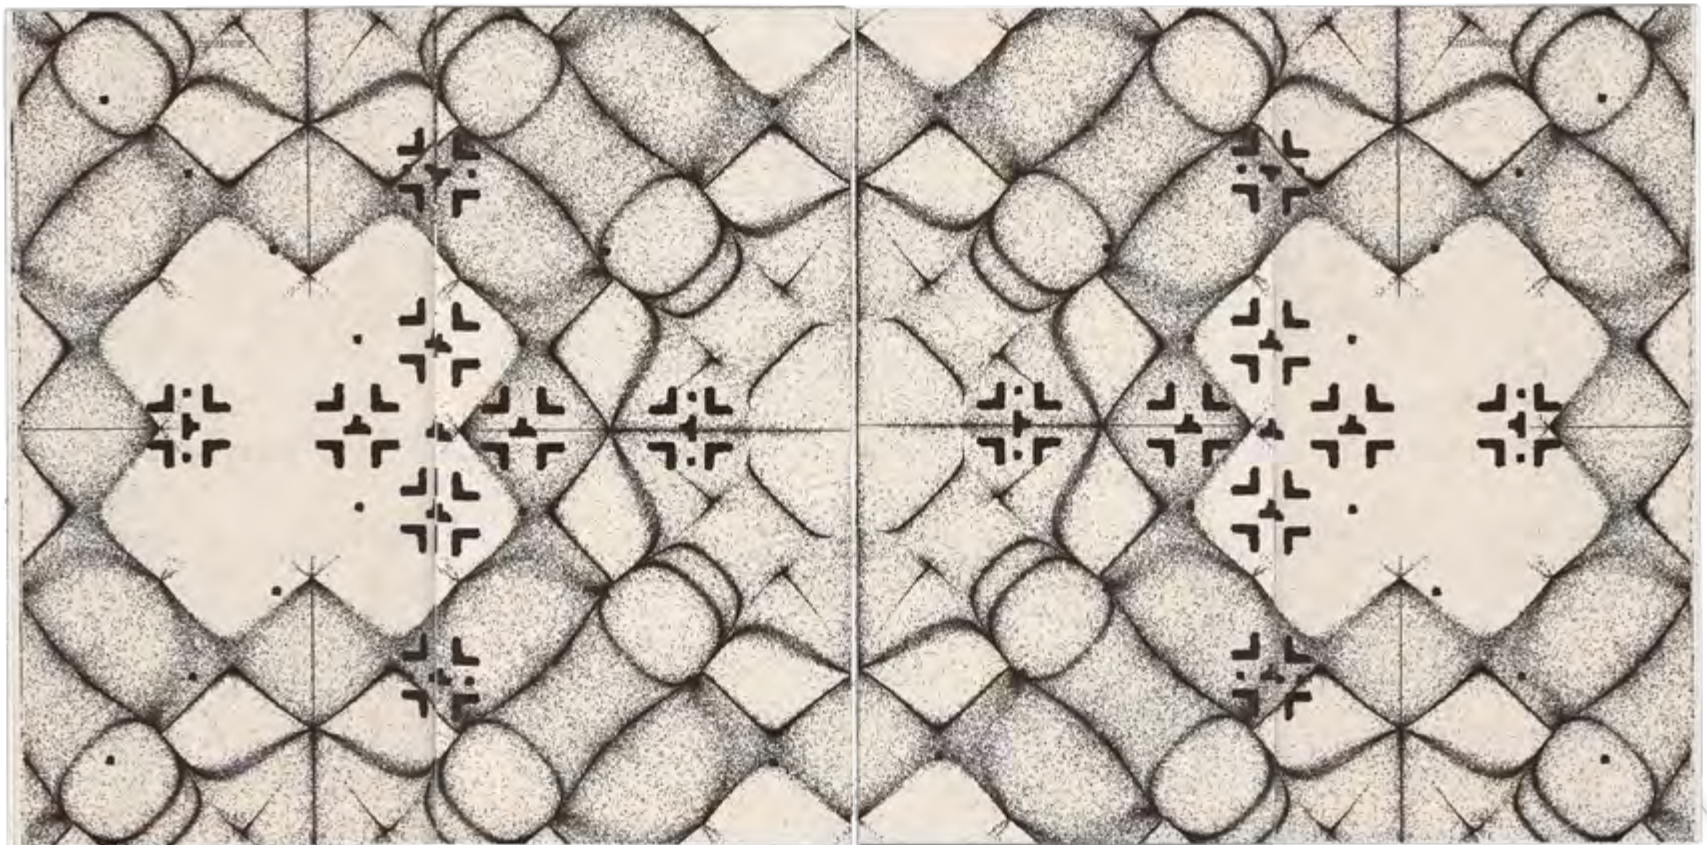

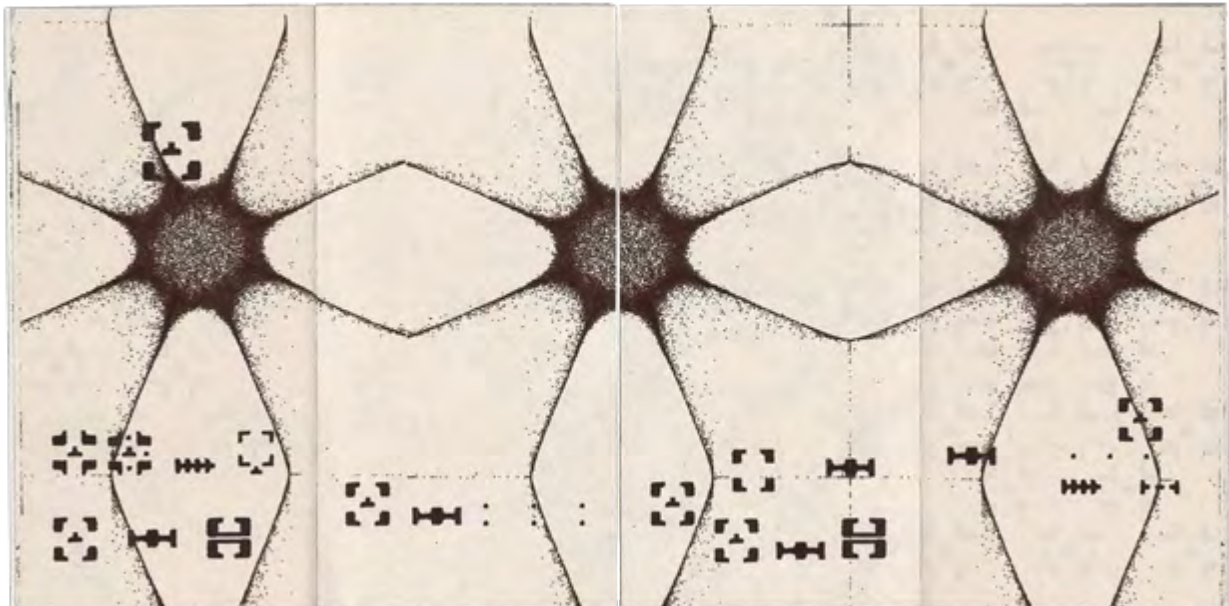

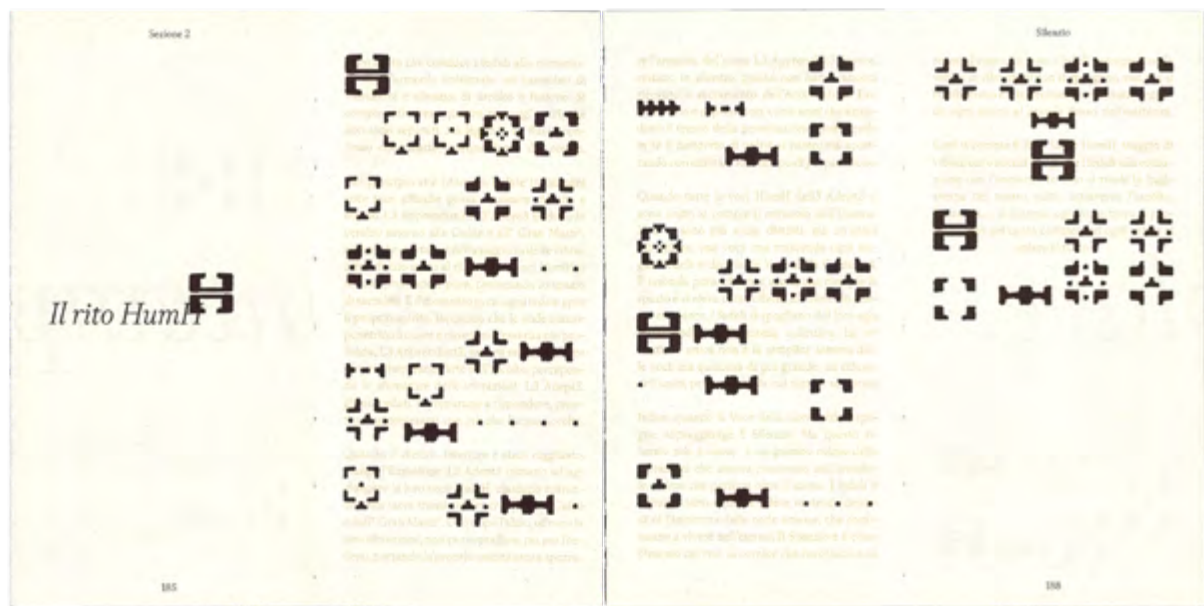

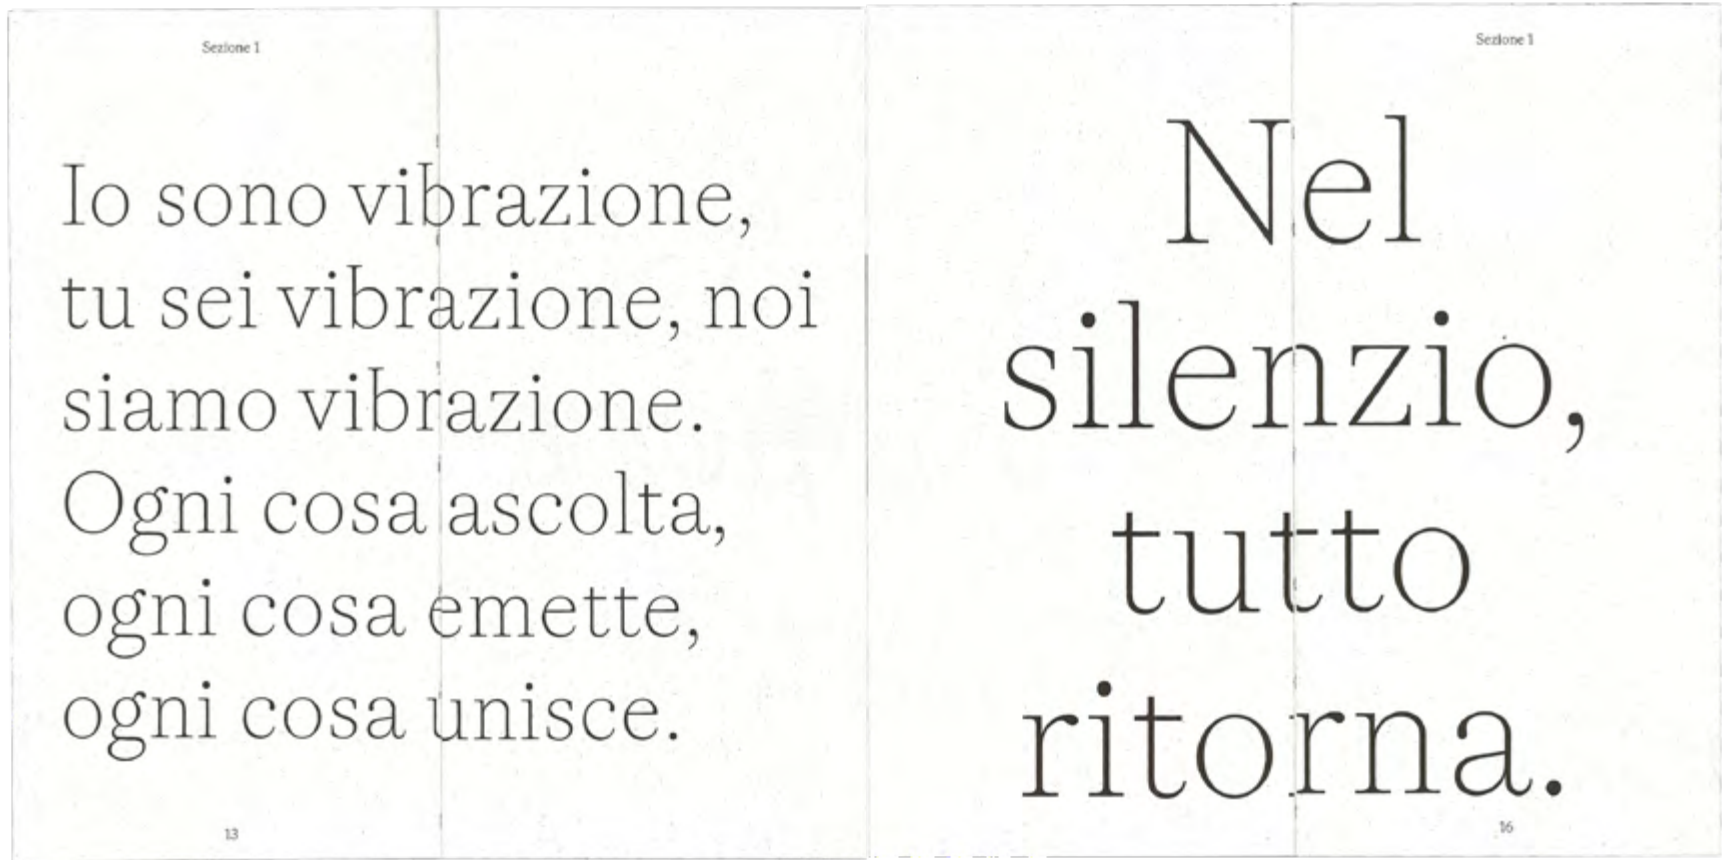

section 1 & 4 > FAVINI Crush Mais 100 g/m²

section 2 > FAVINI Alga Avorio 90 g/m²

section 3 > FAVINI Crush Uva 90 g/m²

Deepening

The communication also aims to promote the exhibition-event *Nel silenzio tutto ritorna*, a participatory experience that explores the core principles of the HumH religion. The event title matches the final part of the cult's mantra and references the concluding phase of the HumH sacred rite. For the exhibition's promotion, various materials were created, including business cards, entry tickets, flyers, posters, and a *distributed glossary*. This consists of 40 square cards, each featuring a symbol on one side and its explanation on the other. This playful approach allows visitors to engage interactively with the decoding of the symbols.

Glossary (70 x 70 mm), business cards (40 x 60 mm),
exhibition tickets (85 x 50 mm) >

Fedrigoni woodstock betulla 285 g/m²

Flyer (A5) >

FAVINI Crush 90 Uva g/m²

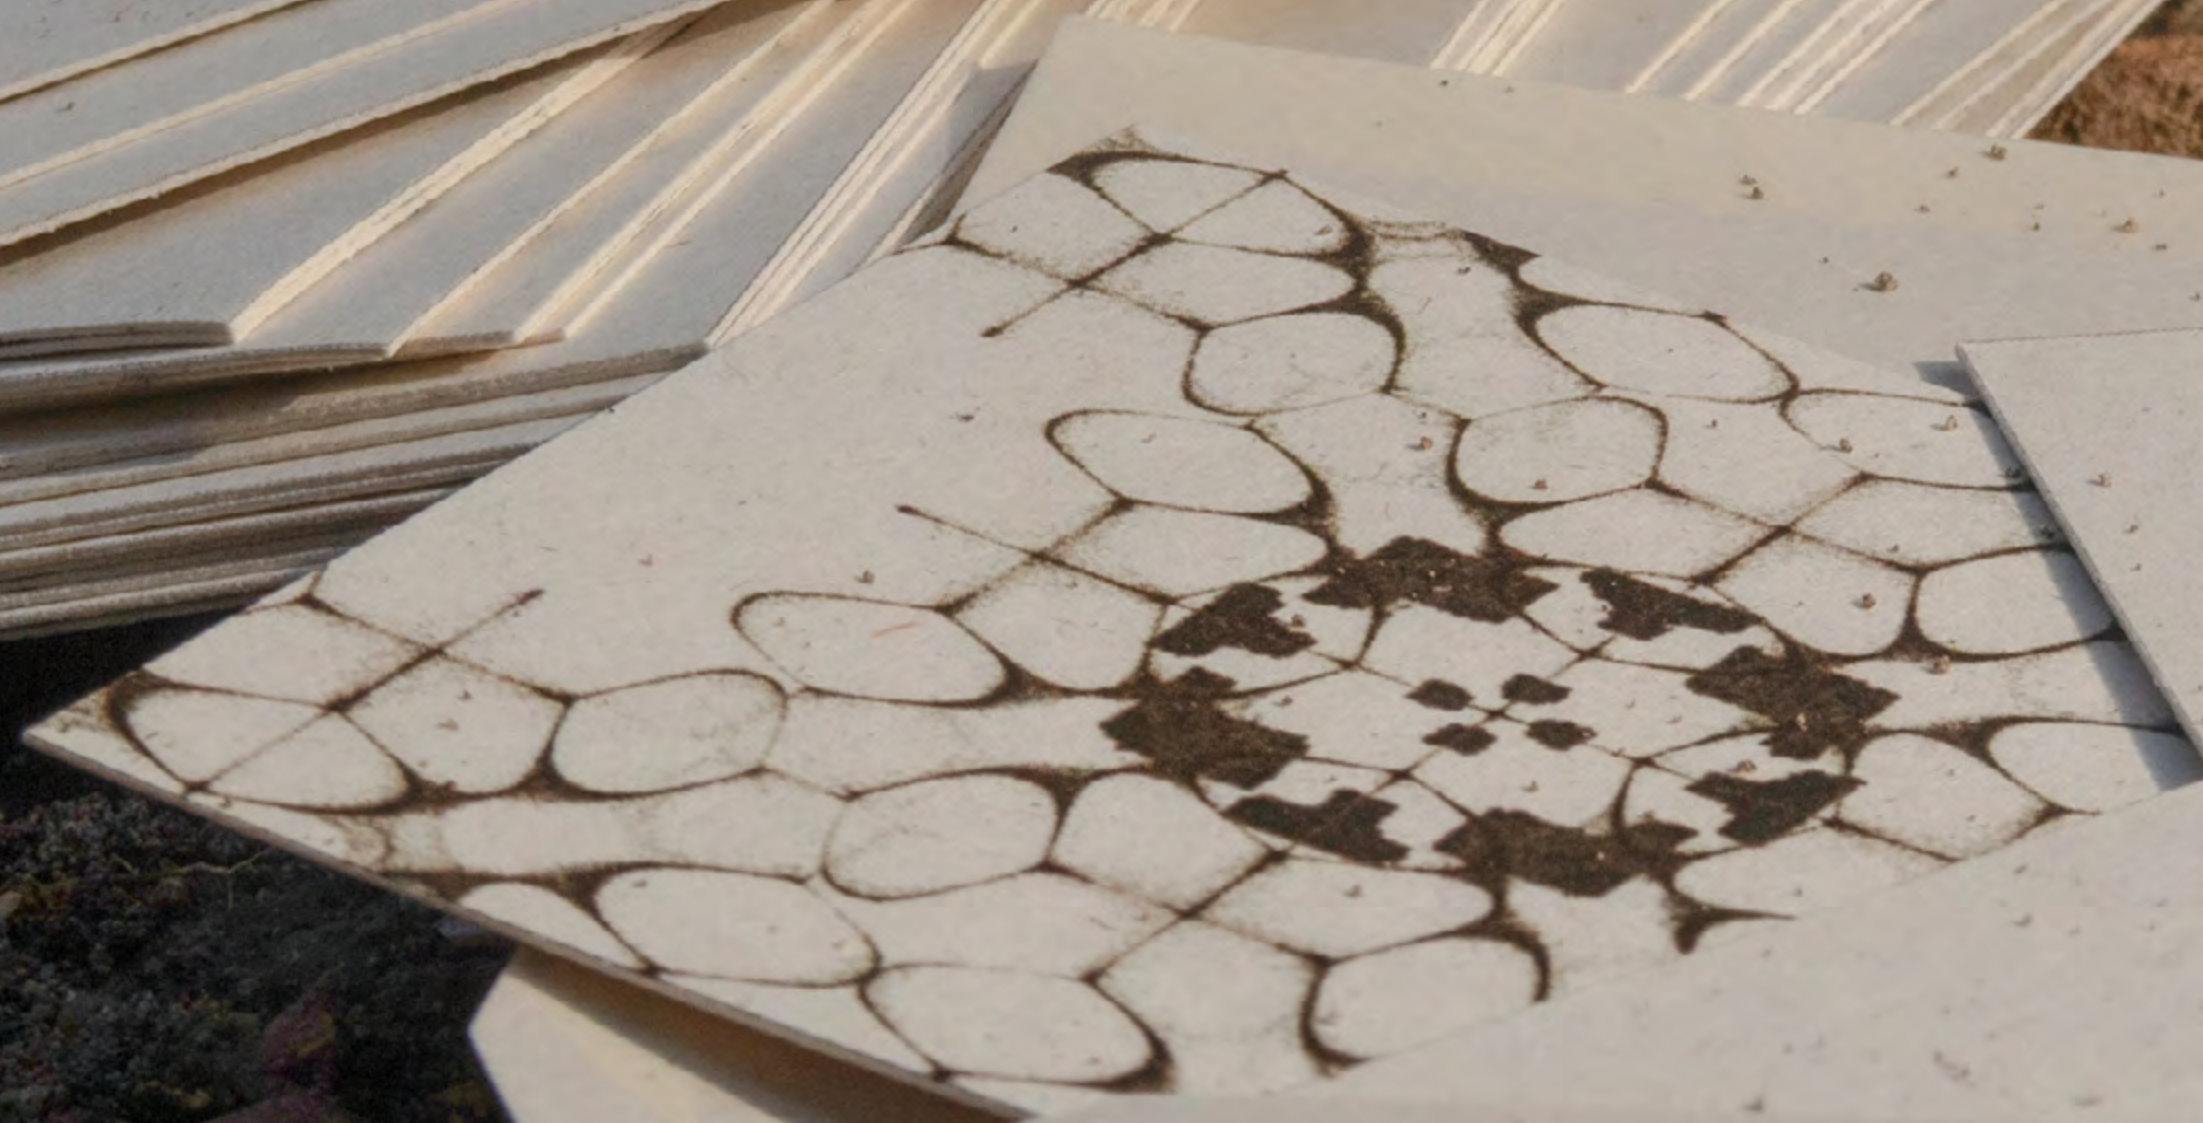

Poster (500x700mm) >

Blueback 120 g/m²

L'AI riscriverà il modo di archiviare?

visual identity

Communication Lab 2,
Iuav University of Venezia
May 2024 - June 2024
Professor — Luciano Perondi
With — Maria Rincon and Nicolas Paolo Salamone

“L’Intelligenza Artificiale riscriverà il modo di archiviare?” (“Will Artificial Intelligence revolutionise the way we store data?”) explores the use of sentiment analysis in the archiving practice of the Venice Biennale. The project analyses the Art Biennale from 1999 to 2019, presenting results and practical examples in an editorial work enriched by a historical introduction. The work is developed by means of algorithmic visualisations created with TouchDesigner, which made it possible to generate the present graphics. The art direction recalls the ‘New Wave’ of publishing, a movement counterculture that moved away from the (well-structured) canons of the industry, offering a visual and experimental narrative.

page 17

DEEPENING

The work is developed using algorithmic visualisations created with TouchDesigner, which enabled the graphics to be generated. The art direction recalls the 'New Wave' of publishing, a counterculture movement that moves away from the (well-structured) canons of the industry, offering a visual and experimental narrative.

Alquimia

visual identity

Commissioned Communication,
June 2024

Alquimia was one of the final projects of the Master in Design for Emerging Futures (MDEF), a program developed in collaboration between IAAC, Fab Lab Barcelona, and ELISAVA. The event featured a series of multidisciplinary performances, including circuit bending experiments. The communication design centered around the ouroboros, a key symbol in alchemical iconography, which was visually reinterpreted to evoke a digital context.

Manipulsanti

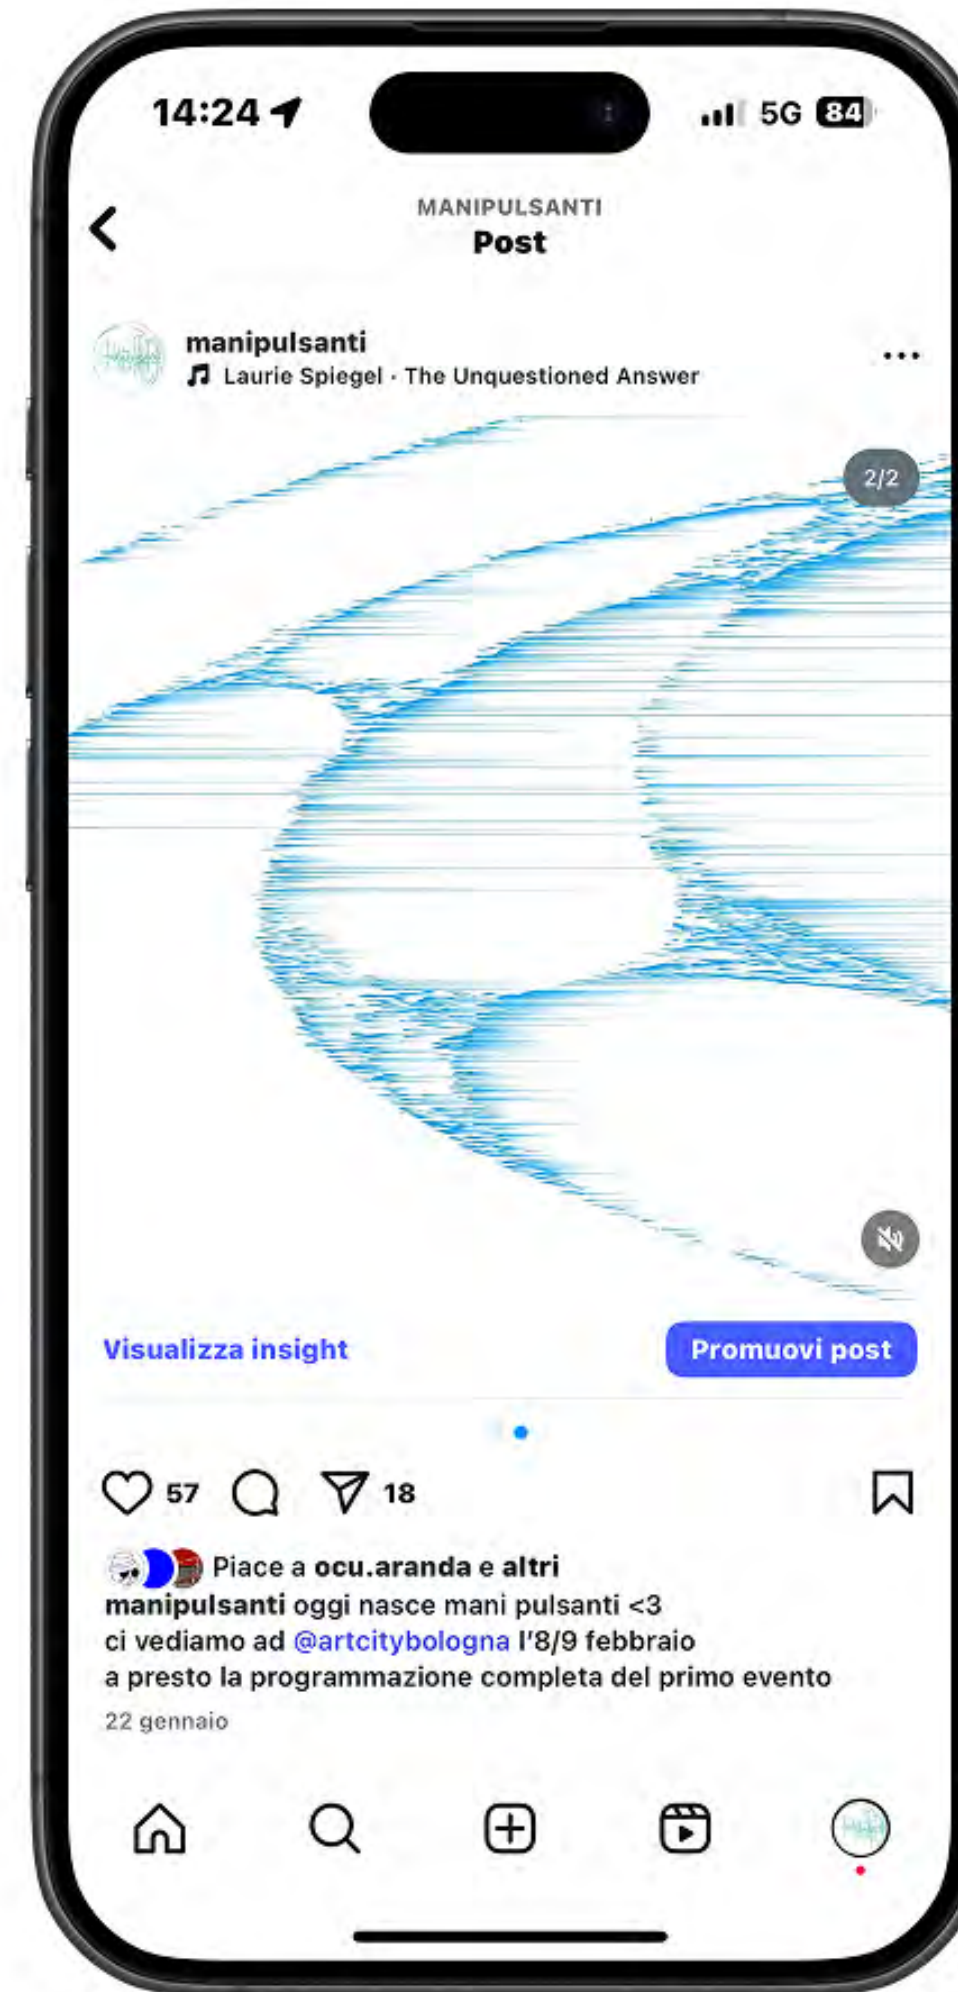

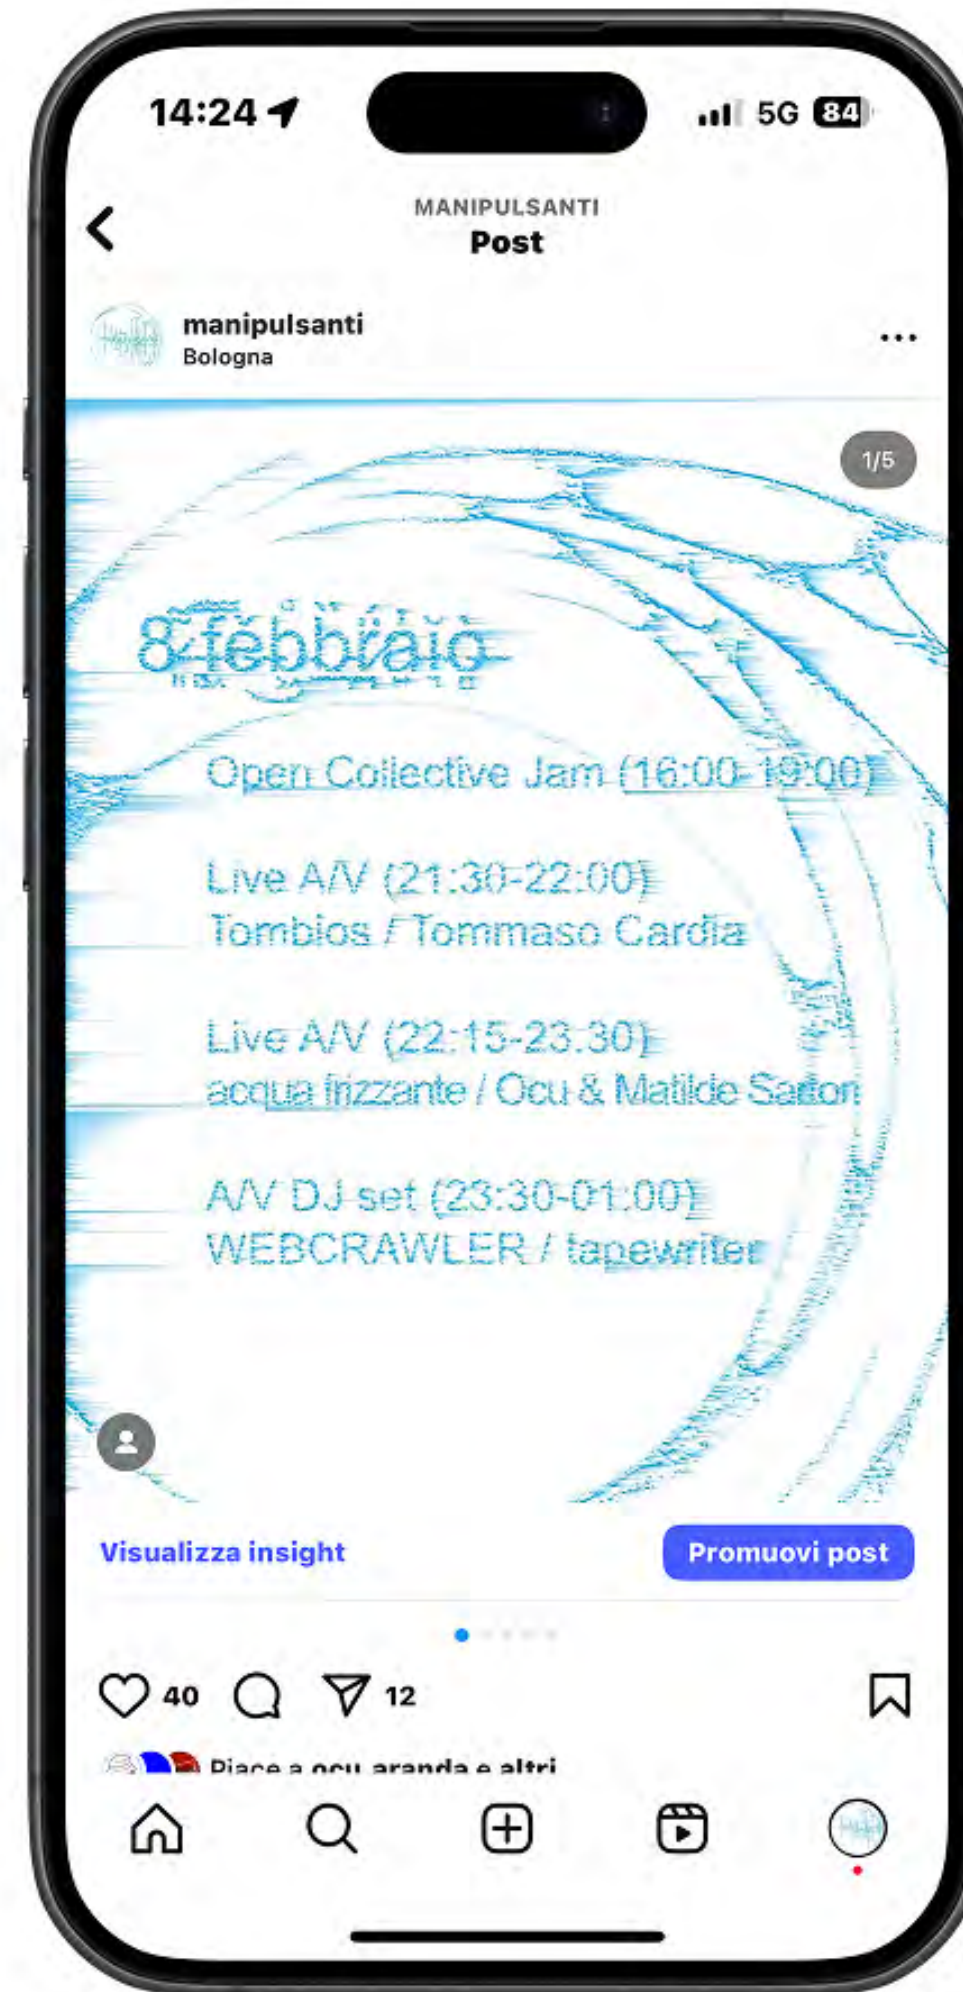

visual identity

Commisioned Communication,
January 2025
With — Nicolò Baldi

Mani Pulsanti is an event focused on live audiovisual experimentation, with an emphasis on improvisation using both analog and digital tools. Spread across two days, the program featured a collective jam session, a series of AV performances, a talk on Live Coding, and an open deck session open to everyone. For the visual identity, a tribal motif was chosen to mimic the spinning shape of a CD. Texts were distorted using a Zalgo generator, and the glitch effect was created through a datamoshing software. The communication campaign included posters, A5 flyers, and Instagram content.

Rubelli 2023 collection

3D modelling

Curricular internship,
Rubelli - Headquarters, Marghera (Venice)
February 2023 - May 2023

Curricular internship carried out at Rubelli, a Venice-based company active since 1858 in the textile and luxury interior design sectors. Within the Rubelli Casa division, the work focused on 3D modeling of furniture, later used for the creation of a brochure, the company's website, and an Instagram filter using augmented reality to virtually place the Pila 47 armchair in real environments.

Deepening

On the occasion of Fuorisalone 2023, an editorial brochure was created to present the new Rubelli Casa collection. The fold-out was distributed at the company's Milan showroom, complementing the physical setup with a visual narrative of the products.

Five-panel brochure

Format > 210 × 740 mm

Binding > Scored and accordion-folded, closed as a booklet

Paper > Favini Burano Bianca 250 g/m²

Four-colour offset printing

Print run 1500 copies

RUBELLI CASA

2023 COLLECTION

[IT] È il Design degli anni del secondo dopoguerra in Italia l'ispirazione principale della Collezione Rubelli Casa 2023. La libertà d'azione di cui gode il mondo del design anni '50 diventa il campo d'azione per la realizzazione di prodotti che infondono speranza e buonumore. Le forme sono morbide, sinuose, bombate od avvolgenti, dalle tinte pastello e dai materiali innovativi.

[EN] Design from the years after World War II in Italy forms the main inspiration for the Rubelli Casa 2023 Collection. The freedom of action enjoyed by the 1950s design world became the arena for the manufacture of products that instil hope and a good mood. The shapes are soft, sinuous, rounded and enveloping, with panel colours and innovative materials.

BULK SOFA

Design MATTEO NUNZIATI
Cod. A12177

[IT] Bulk è un sistema di sedute estremamente versatile, sia a livello compositivo che per la scelta e abbinamento di materiali che possono essere tono su tono oppure a contrasto. La base strutturale imbottita può essere rivestita in tessuto oppure con fasce in pelle, lavorate con la stessa tecnica usata per la valigeria. La base "sollevata" da terra conferisce al divano un aspetto aereo: in voluto contrasto con il volume importante dei cuscini.

[EN] Bulk is an extremely versatile seating system, both in terms of composition and in the choice and combination of materials, which can be tonal or contrasting. The padded structural base can also feature upholstery with leather bands, worked with the same technique used for luggage. The structural base is raised from the floor, giving the sofa an aerial appearance in deliberate contrast to the large volume of the cushions.

WALT SOFA

Design MATTEO NUNZIATI
Cod. A12167 - A12170

[IT] Le forme morbide, avvolgenti e sinuose del divano Walt sono ispirate al design italiano degli anni del secondo dopoguerra. La base di seduta è un alveolo che definisce lo spazio per accogliere una schiena/ bracciolo sinuoso come un corso d'acqua. La sezione dello schienale e le sedute, che si combinano come i pezzi di un puzzle, rivelano un delicato equilibrio tra poligoni e forme curve, in cui la geometria è morbida e il rigore si fonde con la comodità.

[EN] The soft, enveloping and sinuous shapes of the sofa are inspired by Italian design from the post-World War II years. The seat base is a cell that defines the space for accommodating a backrest/armrest as winding as a stream of water. The back section and the seats - that fit together like the pieces of a puzzle - reveal a delicate balance between polygons and curved shapes, in which the geometry is soft and control merges with comfort.

YAK ARMCHAIR

Design MATTEO NUNZIATI
Cod. A12166

[IT] La Yak Armchair è caratterizzata, come gli altri pezzi che compongono la collezione Yak, da un design contemporaneo, da forme curve accoglienti e rasserenanti. Le forme della poltrona Yak sono ingentite dal dettaglio ad arco della seduta e dello schienale che si intersecano armoniosamente con i braccioli. Per la scelta del rivestimento tessile si può attingere alla vasta gamma di tessuti Rubelli adatti per imbottiti.

[EN] The Yak Armchair increases the comprehensive range of modular upholstered furniture Yak and it features a contemporary design, with welcoming and reassuring curved shapes. Yak's shapes are softened by the arched detail of the seat and back that intersect harmoniously with the armrests. For the choice of upholstery, it is possible to draw on the wide range of Rubelli fabrics suitable for upholstered furniture.

PILA-47 OUTDOOR

Design NAVA + AROSIO
Cod. A66993

[IT] Pila-47, la poltrona tessile creata in esclusiva per Rubelli nel 2016 dai designer Paolo Emanuele Nava e Luca Maria Arosio - fondatori di Nava+Arosio Studio - è ora disponibile nella versione outdoor. Pila-47 Outdoor si differenzia dalla Pila-47 solo nella scocca, resistente agli agenti atmosferici. Perfetta combinazione di design e performance. Pila-47 Outdoor è pronta ad arredare terrazzi e giardini.

[EN] Pila-47, the fabric-covered armchair designed in 2016 exclusively for Rubelli by the young designers Paolo Emanuele Nava and Luca Maria Arosio, founders of Nava+Arosio Studio, is now available in the outdoor version. Pila-47 Outdoor differs from Pila-47 only in the shell, that is weather-resistant. A perfect combination of design and performance. Pila-47 Outdoor is ready to furnish terraces and gardens.

ALA BED

Design MATTEO NUNZIATI
Cod. A15004

[IT] Il letto Ala ha proporzioni generose e moderne, con una testata imbottita, elegante ed avvolgente. Progettato per diventare protagonista della camera da letto, Ala si riconosce per la grande testata leggermente inclinata e conferisce da una doppia incorniciatura fasce di eleganti fasce in tessuto tono su tono. Questo letto esalta la bellezza e l'esclusività dei tessuti Rubelli.

[EN] The Ala bed has generous modern proportions, with an elegant and enveloping padded headboard. Designed as a key feature in the bedroom, Ala is recognisable by its large, slightly sloping headboard, featuring double cushioning enriched by elegant tonal fabric bands. A headboard that enhances the beauty and exclusive quality of Rubelli fabrics.

DUDU BED

Design MATTEO NUNZIATI
Cod. A15003

[IT] Dudu è un letto tessile della linea elegante e vintage. Morbido ed avvolgente, è ispirato alle forme sinuose del design anni '50. Si distingue per la caratteristica testata ricurva che avvolge delicatamente la struttura imbottita rivestita in tessuto. La cura per i particolari è definita dal prezioso dettaglio del doppio cuscino e delle cuciture tone su tono che esaltano la bellezza e la preziosità dei tessuti Rubelli.

[EN] Dudu is a dreamy and vintage line for a well and enveloping textile bed, inspired by the sinuous shapes of 1950s design. Dudu stands out with its characteristically curved headboard that delicately wraps around the padded fabric-covered frame. Careful crafting is defined by the precious detail of the double cushion and tonal stitching that showcases the beauty and preciousness of Rubelli fabrics.

SINUA CHEST OF DRAWERS SINUA NIGHTSTAND

Design MATTEO NUNZIATI
Cod. A16034 - A16035

[IT] Il comodino Sinua e il cassetto Sinua si aggiungono agli altri complementi d'arredo della collezione Sinua, caratterizzata da pannelli rivestiti in tessuto che richiama all'origine del nome Sinua (sinuare, sinuoso). Il elemento distintivo è il contrasto tra la linearità delle parti in legno naturale e la curva morbida dei pannelli in tessuto ai lati e sul retro. Per il rivestimento tessile sono stati selezionati una serie di tessuti Rubelli adatti a questo uso.

[EN] Sinua Nightstand and Sinua Chest Of Drawers increase the furniture items in the Sinua collection, characterised by curved panels covered in fabric, which are the origin of the name Sinua (sinuare, sinuous). The distinctive element of this collection is the contrast between the linearity of the natural wood tops on the sides and on the back. A series of Rubelli fabrics suitable for this use have been selected for the textile upholstery.

Generative Storytelling

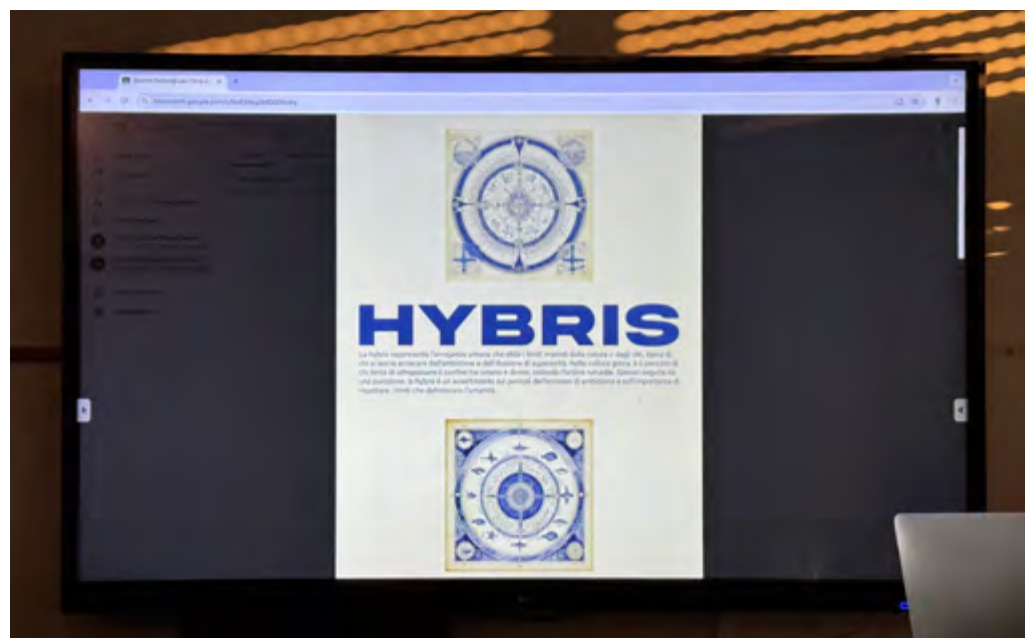

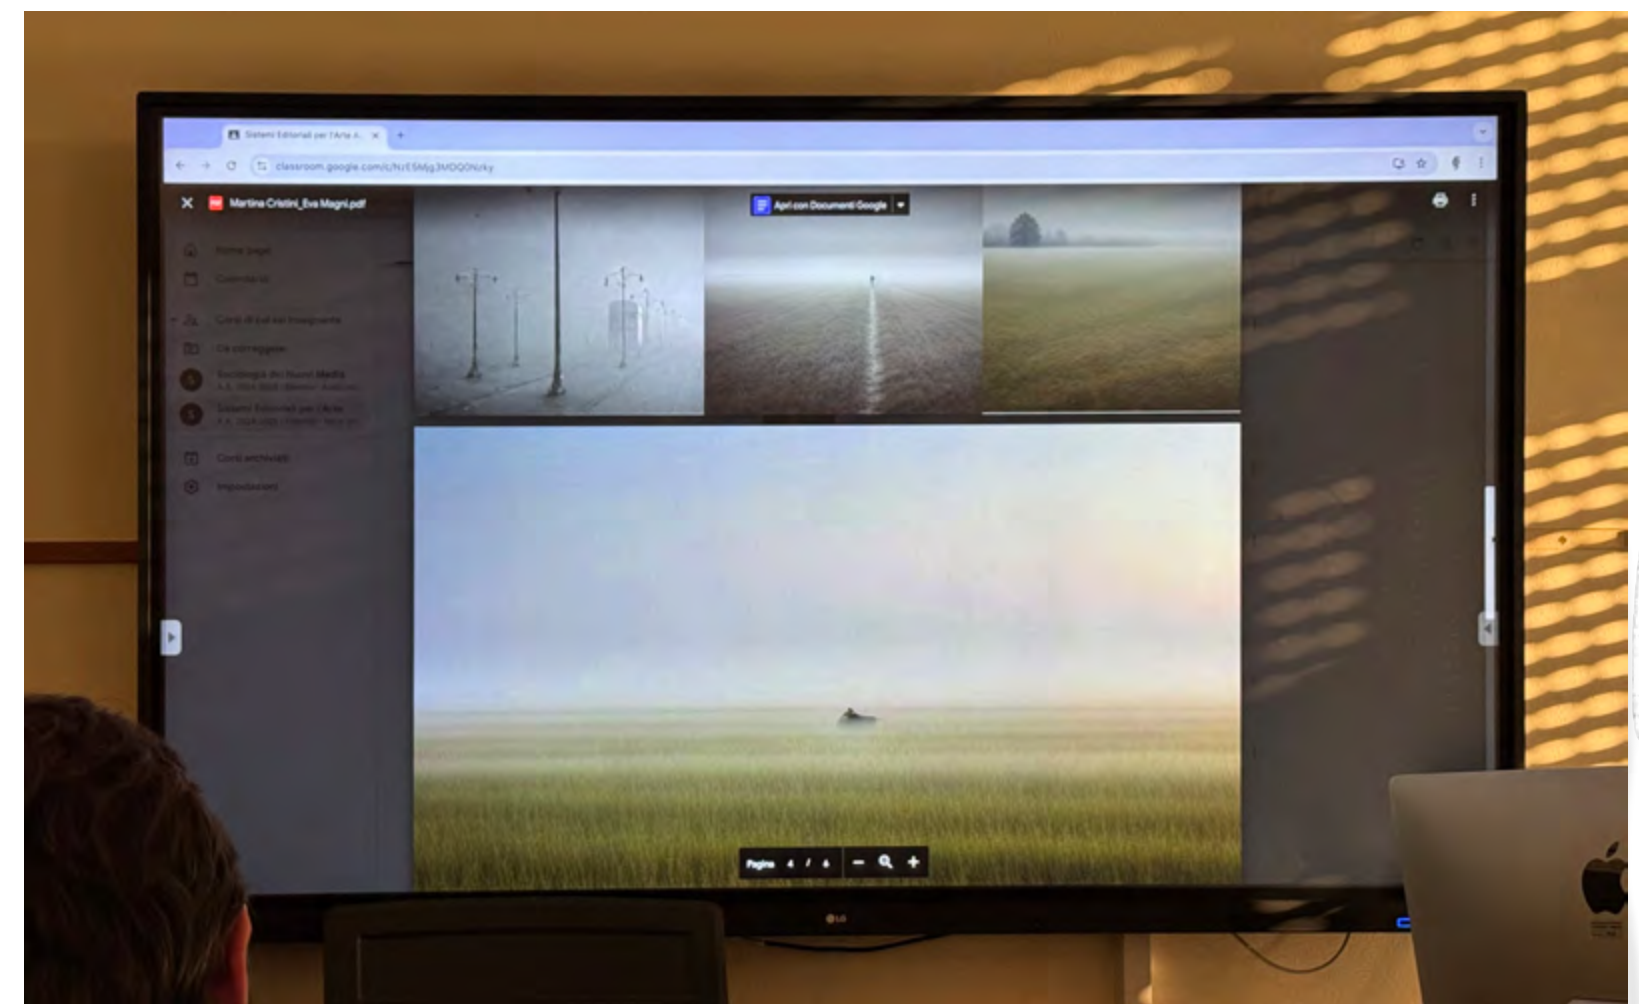

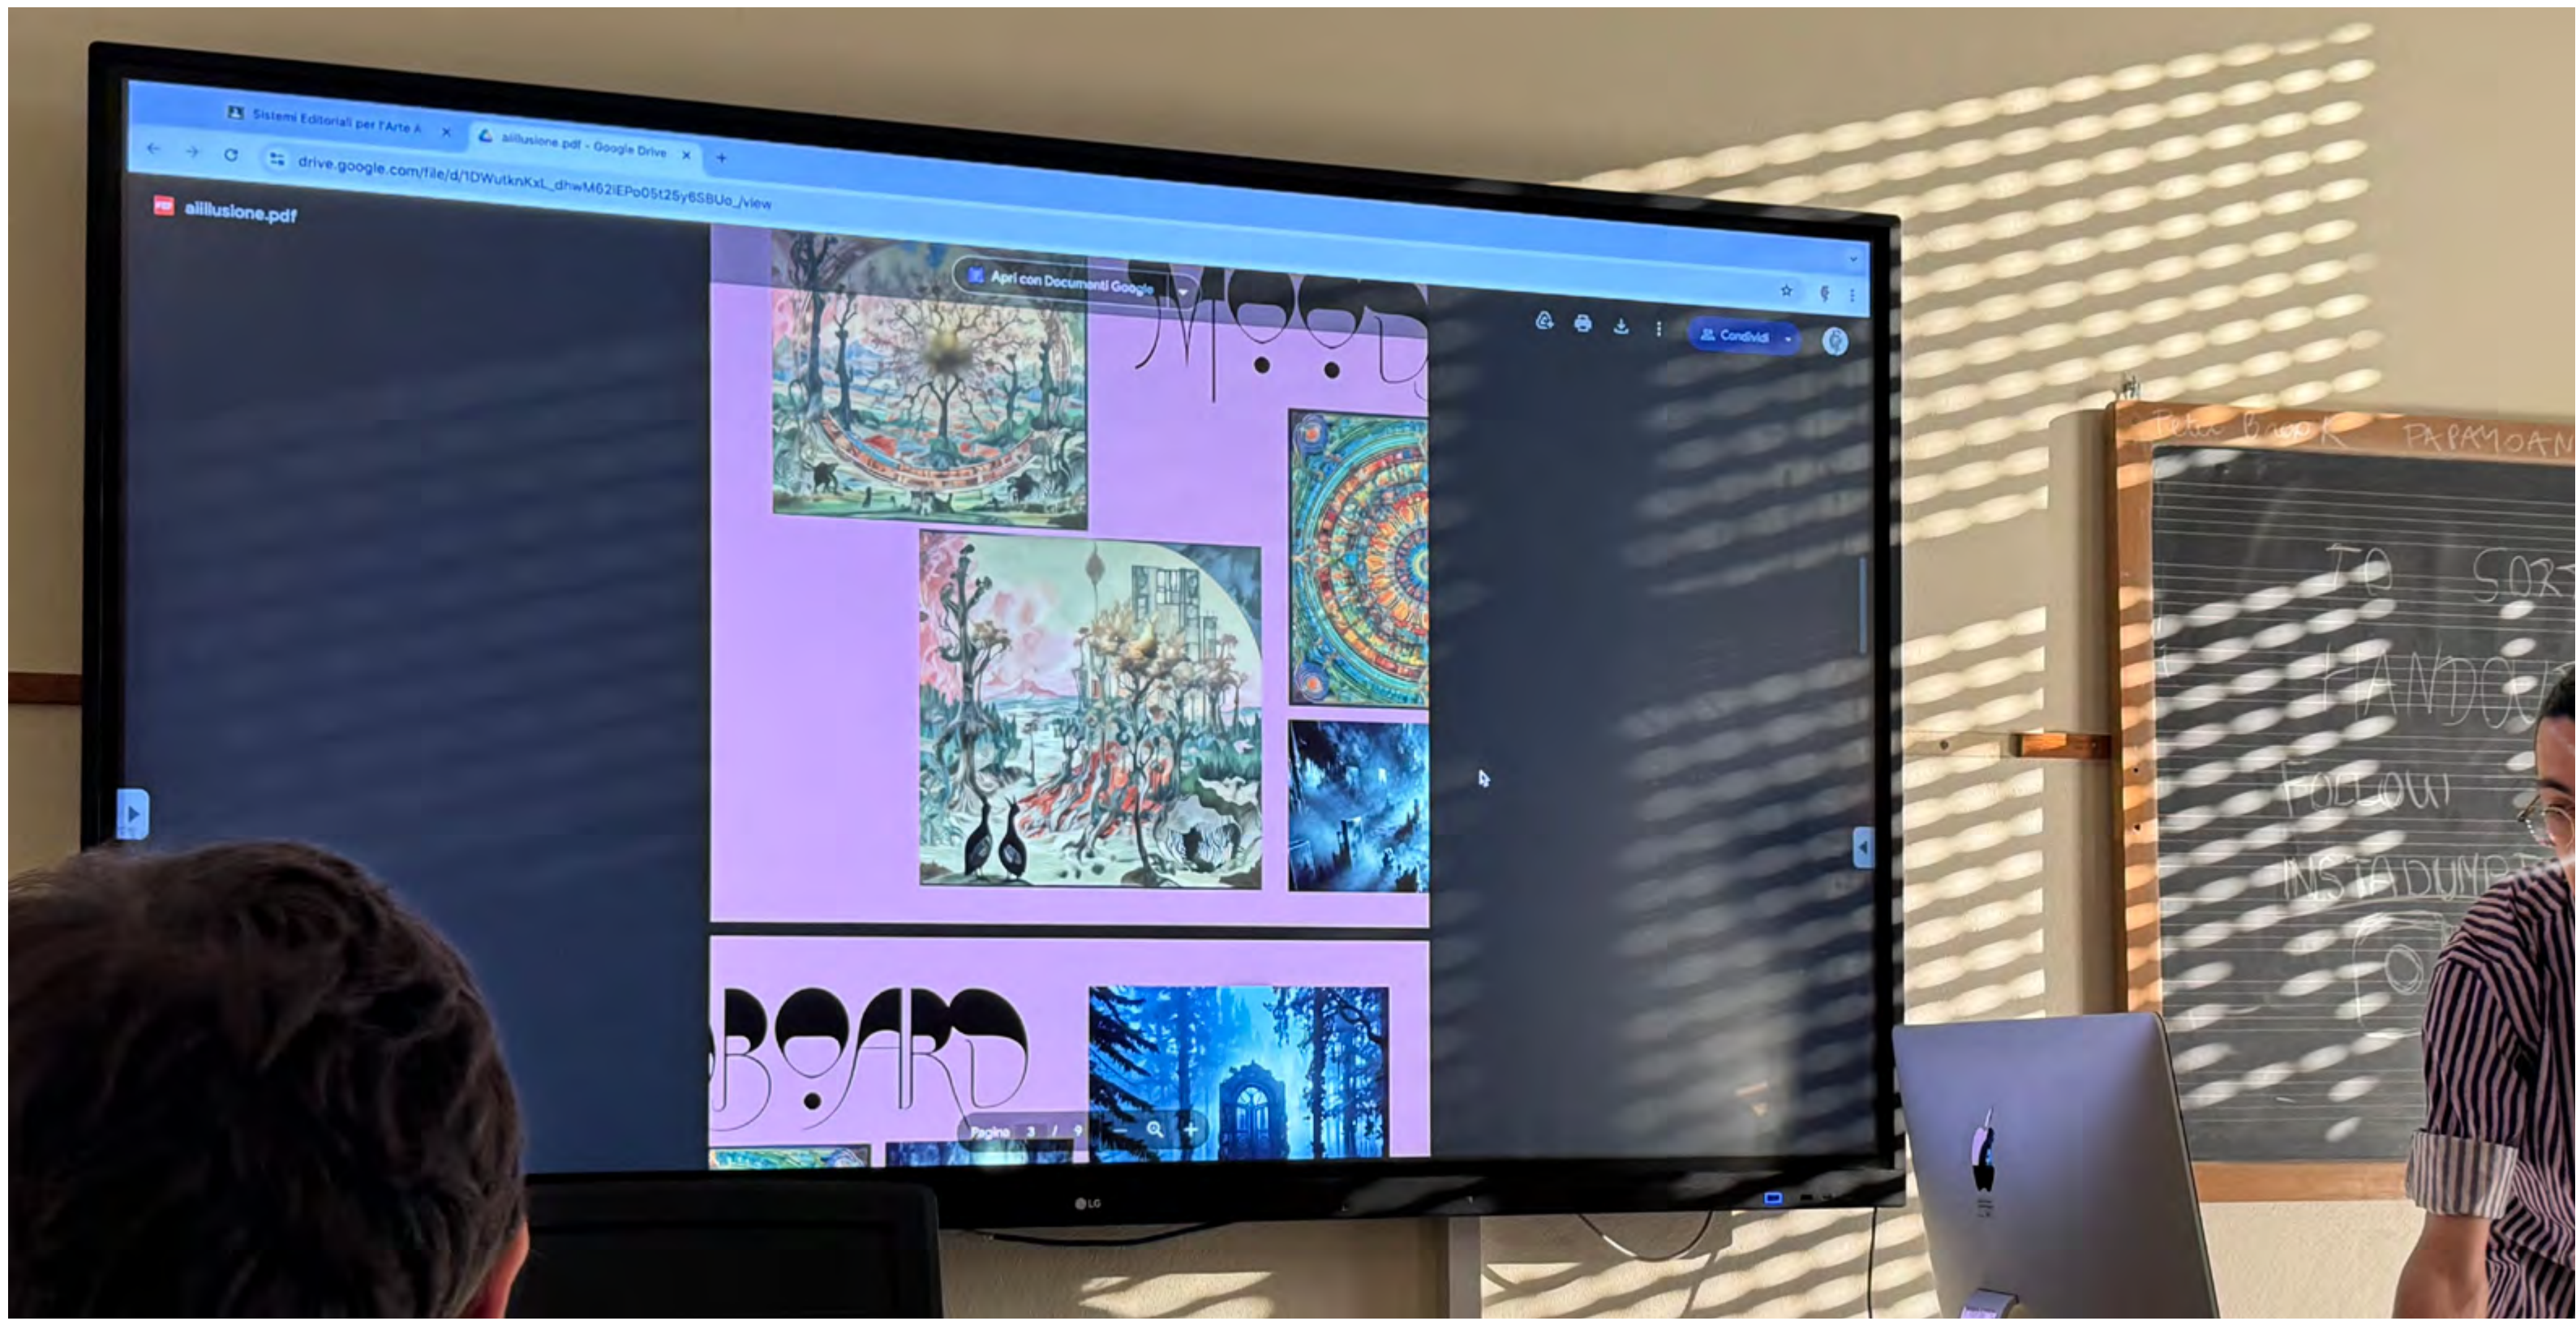

workshop organisation

Politecnico delle Arti of Bergamo

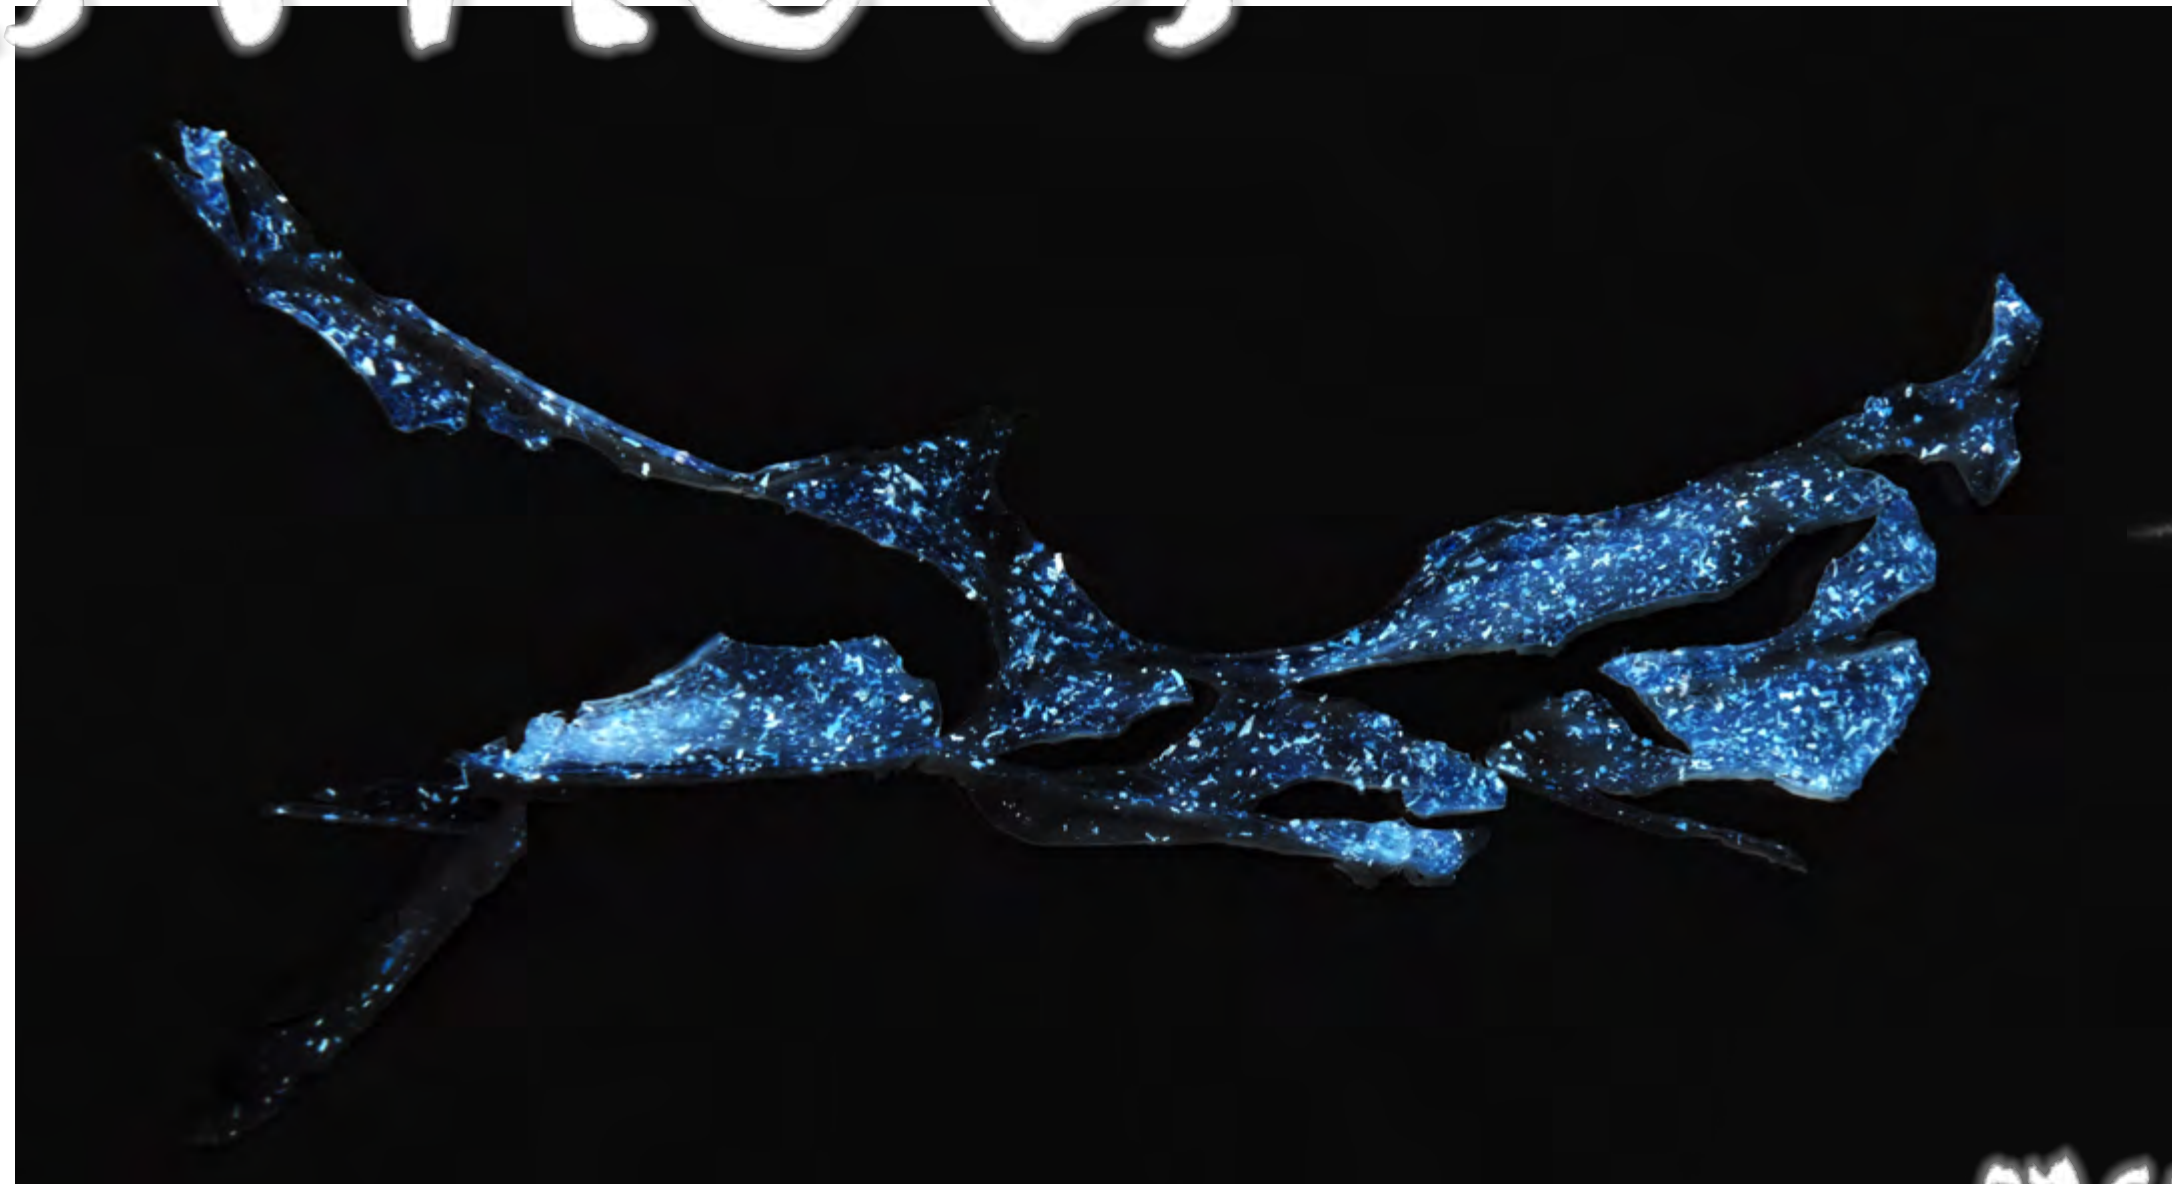

14 e 28 November 2024

Co-led by professor — Marco Mancuso

On November 14 and 28, 2024, two workshop sessions were held at the Politecnico delle Arti di Bergamo for second-year students of the Bachelor's program in Visual Communication Design. The activity was part of the course Editorial Systems for Art, taught by professor Marco Mancuso. The first session provided a historical overview of "Artificial Intelligences," tracing key milestones and diving into the workings of GPT chatbots (e.g., ChatGPT) and TTI tools (e.g., MidJourney), accompanied by hands-on exercises. The second session focused on editorial applications, with case study analysis and the autonomous creation of a zine using the tools introduced.

mimè'si

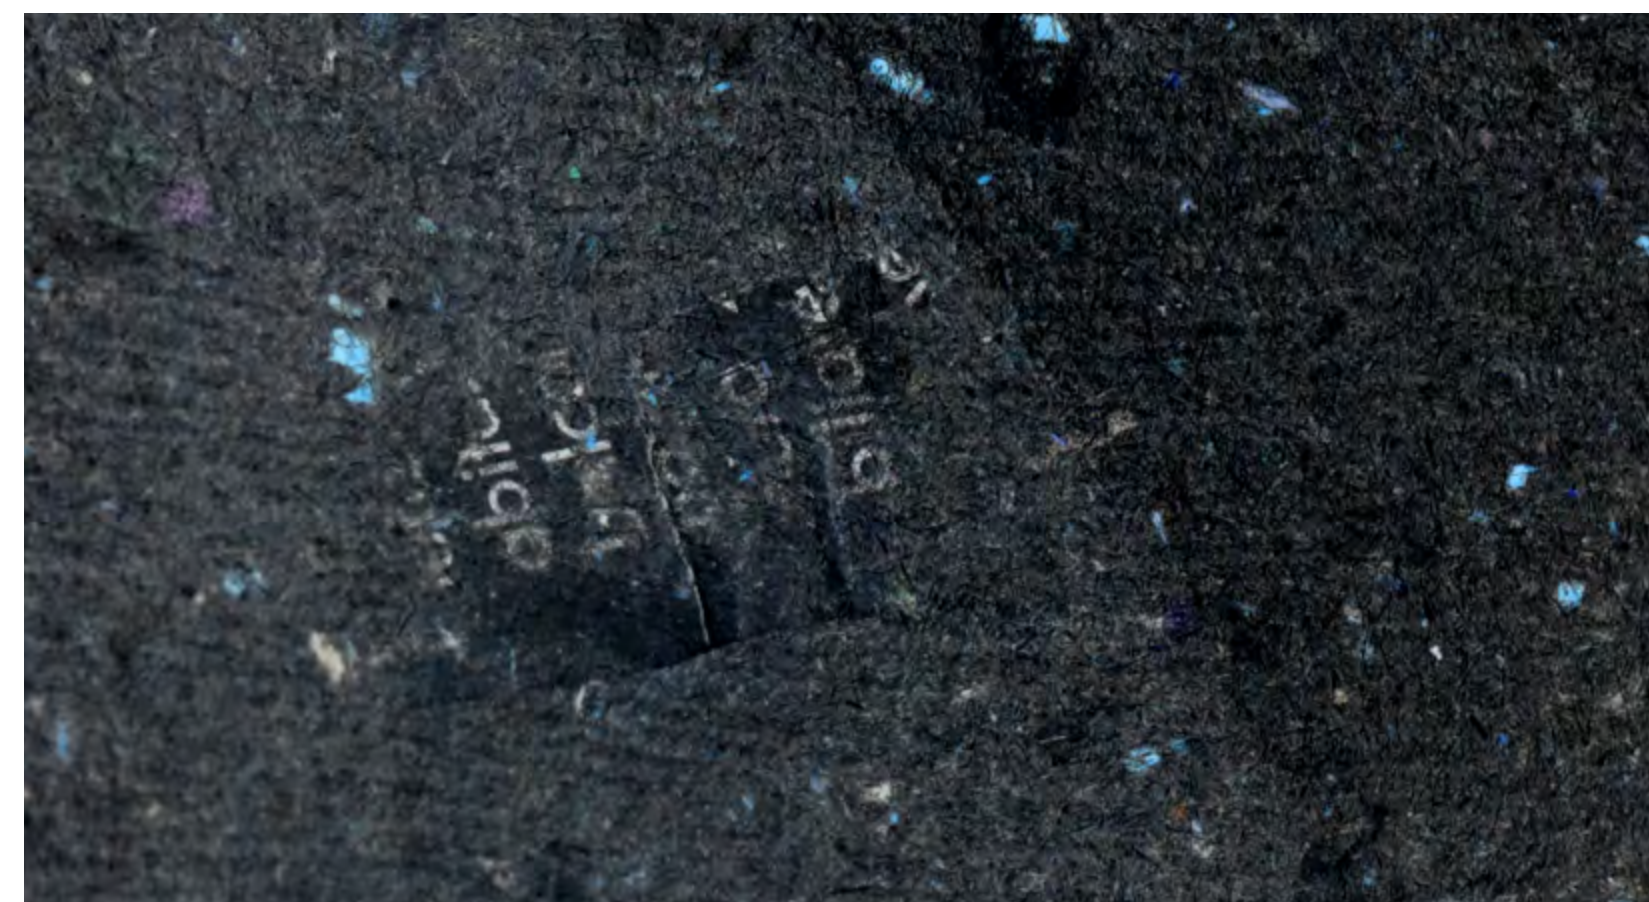

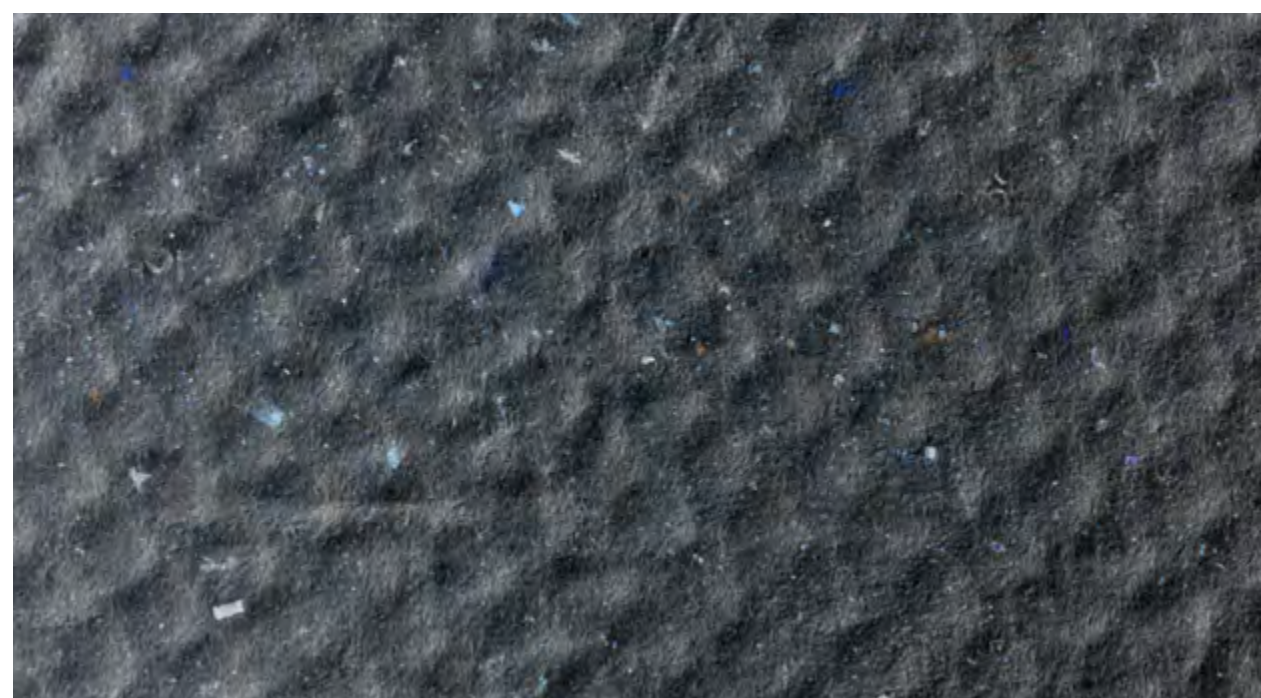

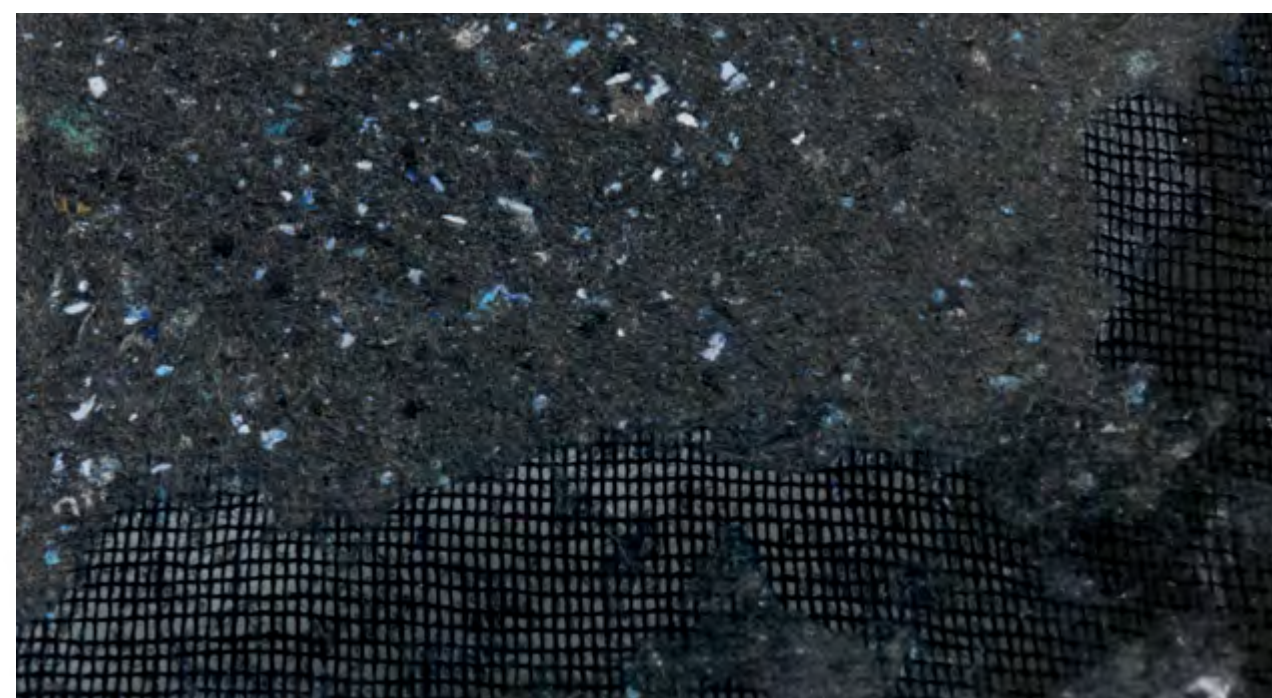

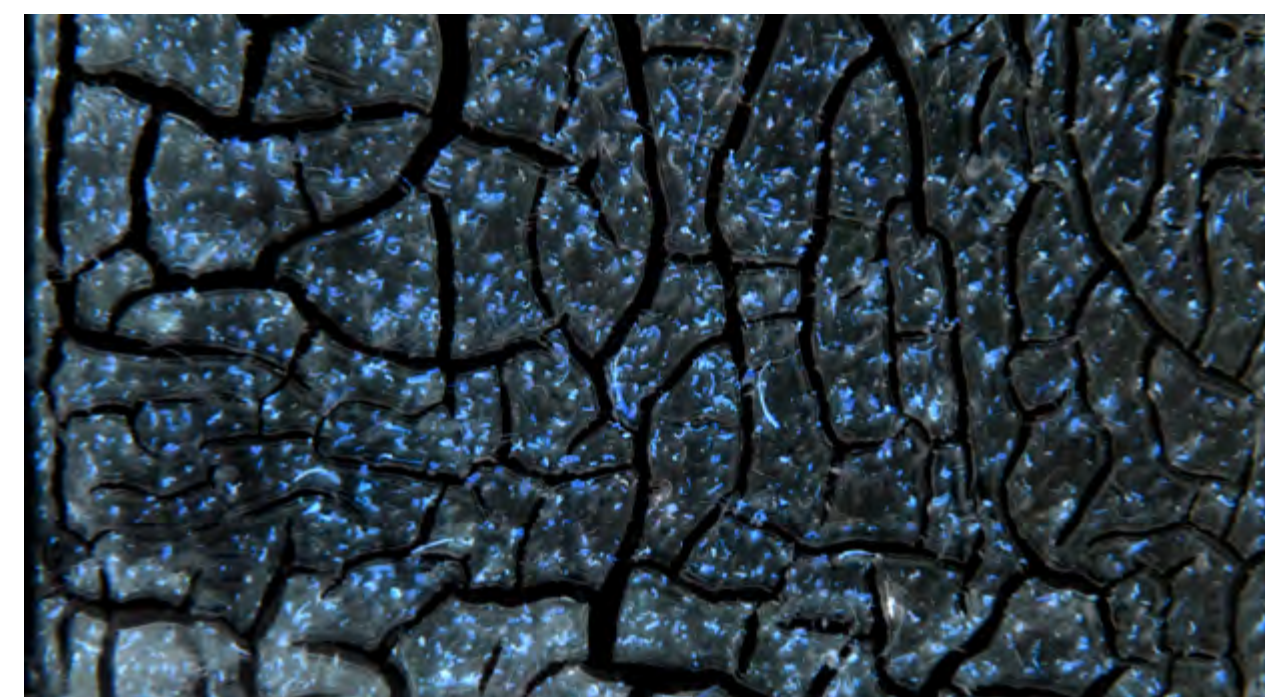

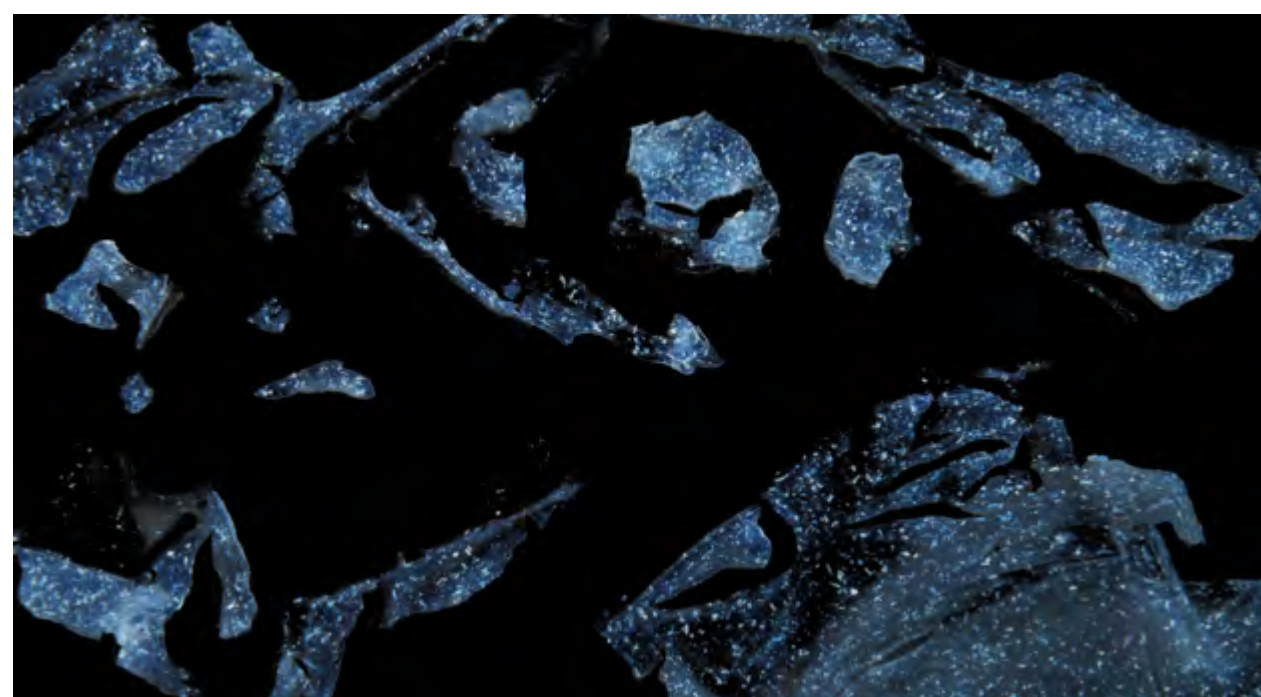

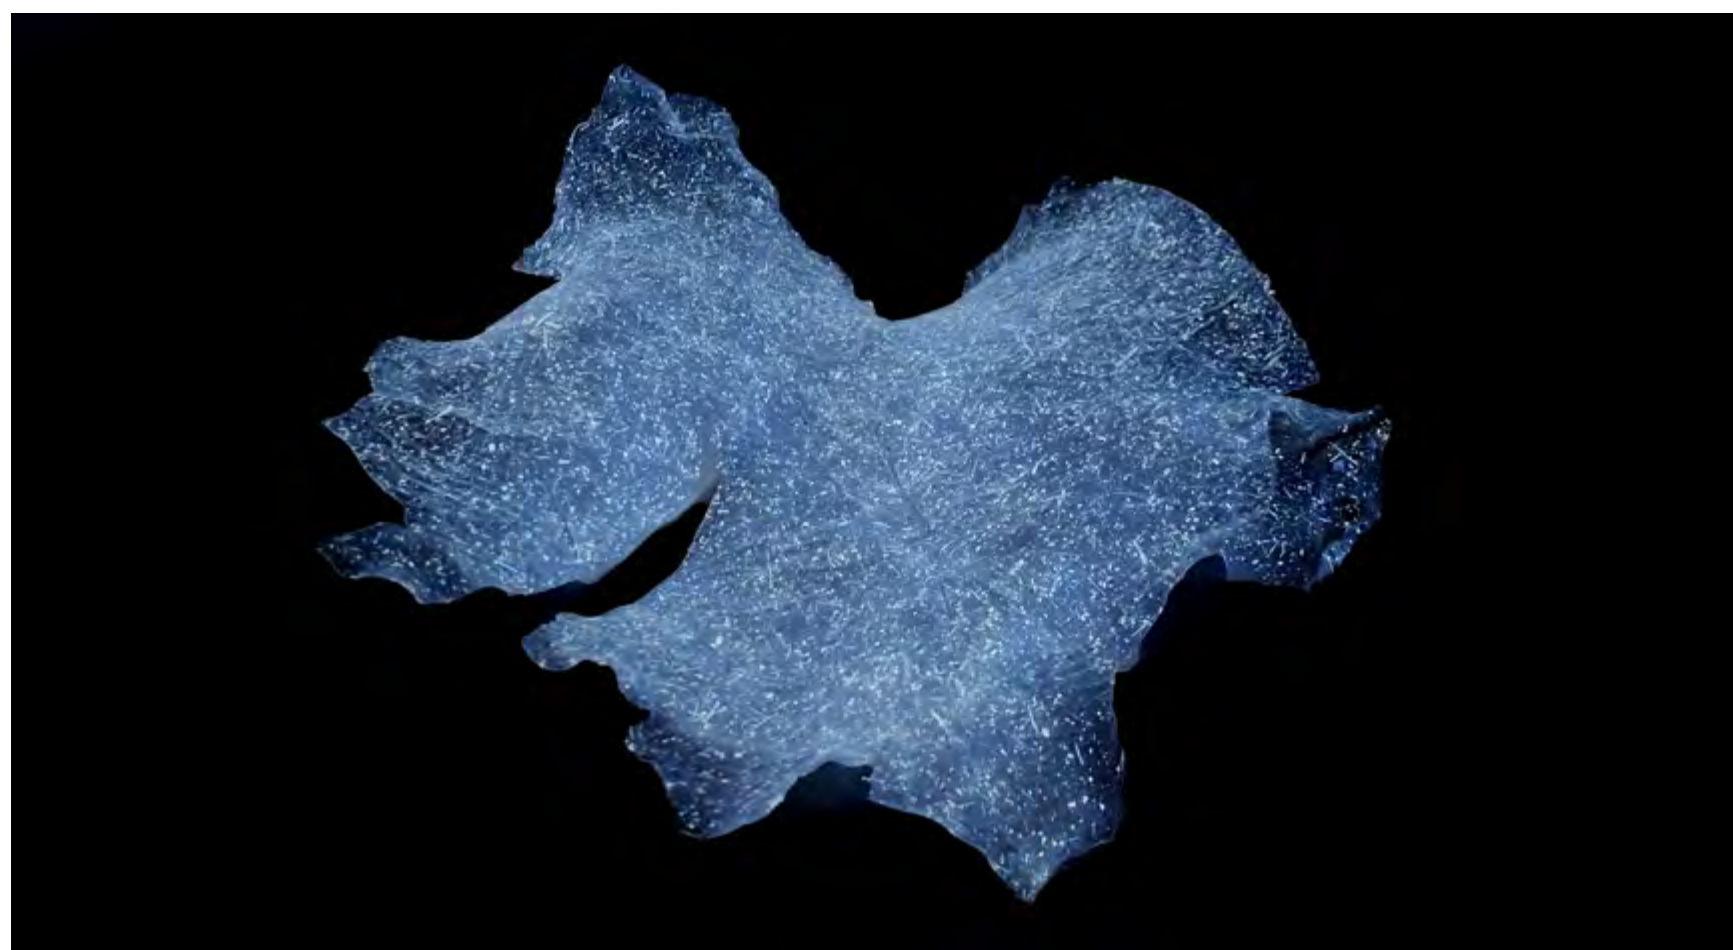

speculative research

Industrial Design lab T-II,
Alma Mater Studiorum University of Bologna
March 2022 - June 2022
Professor — Riccardo Varini
With — Nicolò Baldi, Leonardo Bettini and Claudio
De Simone

The project explores and reinterprets nature through the concept of mimesis, understood as the imitation of its processes. Using wicker powder, it creates textures that engage both sight and touch, applied to materials like concrete, paper, and bio-plastics, with potential for use on other surfaces. The catalog presents the results, outlining techniques and materials, and encourages readers to freely experiment and reinterpret the processes. The photographic research documents each step, highlighting the connection between art and nature and revealing the project's creative potential.
